# Sustainable casework designed specifically for dental environments.

We have aligned our Synthesis® Casework product attributes with LEED®, the nationally accepted benchmark for the design, construction and operation of green building projects.

The Leadership in Energy and Environmental Design (LEED®) Green Building Rating System is a third-party certification designed to encourage and accelerate the adoption of sustainable green building. LEED® promotes a whole-building approach to sustainability by recognizing performance in five key areas of human and environmental health: sustainable site development, water savings, energy efficiency, materials selection and indoor environmental quality.

## Benefits

As cited on the U.S. Green Building Council (USGBC) website ([usgbc.org](http://usgbc.org)), there are both environmental and financial benefits to earning LEED® certification. LEED-certified buildings are designed to:

- Lower operating costs and increase asset value
- Reduce waste sent to landfills
- Conserve energy and water
- Be healthier and safer for occupants
- Reduce harmful greenhouse gas emissions
- Qualify for tax rebates, zoning allowances and other incentives in hundreds of cities
- Demonstrate an owner's commitment to environmental stewardship and social responsibility

## Partner with us

We want to be your partner in LEED® certification of green buildings, today and into the future. Because we care... we support the contribution to a more sustainable, healthier environment and are committed to providing "greener" products without passing the additional costs to our customers.

The use of Synthesis® Casework Collection by Midmark can contribute to specifier strategies and LEED® credits that impact building certification including:

- Water efficiency
- Construction waste management
- Material reuse
- Recycled content
- Local/regional materials
- Low emitting materials

## How Midmark can help

Please visit our website ([midmark.com](http://midmark.com)) to see how our unique product attributes have been designed to assist you in obtaining credits within the LEED® family of rating systems, along with a comprehensive list of those credits.

For further information on LEED®, please visit the USGBC website at [usgbc.org](http://usgbc.org).

**CARB 93120.2 Phase 2 Compliant**

**Midmark is an ISO 13485 and ISO 9001 Certified Company.**
