Seeing is believing.

The Midmark LED Operatory light is a market-driven solution utilizing cutting edge LED technology to provide the ultimate in dental lighting. It provides the true, reduced shadow white light you need to properly match shades, identify details and diagnose tissue. The Midmark LED offers a feathered edge to minimize eye strain caused by sharp edges with high contrast differences. Time-tested, user-friendly features simplify use of the light as well as minimizing fatigue, time and motion. The Midmark LED accomplishes all of this while using only 22 watts of electricity, less than half of the leading dental LED light.
