

9A81001 ARTICULATING ARMBOARD

KIT COMPONENTS

Part Number	Description	Qty.
9A81001	Articulating Armboard.....	1
or		
003-0373-00	Installation / Operation Instructions	1

REQUIRED TOOLS

3 mm Allen (Hex) Wrench

INTRODUCTION

To hold an arm in a secure position. The 9A81001 Armboard is used on medical exam tables.

Mount Armboard on siderail bar of exam table or stretcher. Use caution when positioning Armboard and/or table. Do not use with any other accessories on same side of table. When used with siderail in *down* position assure patient is restrained to prevent accidentally falling from unit during procedures. Always support Armboard assembly when changing positions on it. Assure all positions are solidly locked to prevent sudden movement during procedure.

INSTALLATION

MA444100

- A. Slide swivel block onto side rail to desired position.
- B. Rotate lock handle to one side to lock swivel block onto side rail.

OPERATION (ARTICULATION)

MA444200

- A. Supporting Armboard, pull up on handle.
- B. Rotate Armboard to desired position, release handle.

OPERATION (HEIGHT ADJUSTMENT)

MA444300

- A. Supporting Armboard, loosen clamp handle.
- B. Raise or lower Armboard to desired position.
- C. Tighten clamp handle.

ADJUSTMENT (LOCKING SYSTEM)

MA443600

EQUIPMENT ALERT

It may be necessary to adjust locking system periodically. Use a 3mm Allen wrench.

- A. Check handle for 1/8" (3.2 mm) to 3/16" (4.8 mm) free movement (distance handle moves without releasing).

NOTE

If handle free movement is not within above dimensions continue with following steps.

To tighten or loosen armboard movement:

- B. Turn both screws 1/8 to 1/4 turn clockwise to tighten or counterclockwise to loosen movement.
- C. Loosen locking screw.
- D. Turn adjustment screw clockwise or counterclockwise until free movement of handle is within tolerance.
- E. Tighten locking screw.
