

Midmark Medical On-Site Training

Overview

Training classes for our Medical products are available to our Medical product dealers and certified Midmark service companies only. (If you are interested in becoming a certified Midmark service company, please follow the link found under the Support, Technical Support – Medical tab on our website).

Please check the Schedule for our complete listing of medical products training classes and refresher classes. (Refresher training classes are available for recertification to anyone who has attended a Midmark training class within the past five years). Our Medical Products training classes are three days long beginning on Tuesday morning and running through Thursday afternoon at a cost of \$600 per person. The Refresher training class begins on Tuesday morning and runs through Wednesday afternoon at a cost of \$400 per person.

We ask that our guests arrive in Versailles by 5:00 pm on the Monday prior to the start of class. For those guests who will be flying in, we suggest that you arrive at the Dayton International Airport by 4:00 pm on Monday. We will make scheduled pickups at the Dayton Airport at 1:00pm and 4:00pm on that day. If your scheduled arrival time is after 4:00 pm, you will need to arrange your own transportation to Versailles, OH (approximately 40 miles).

The registration fee covers the cost of the training class, lodging at The Inn at Versailles, meals and all necessary transportation for our guests.

If you would like to attend one of the training classes, please go to the Register for a Class link, complete the registration form and you will receive a confirmation via e-mail. Each class can only accept the first 12 guest registrations.

If you have any questions, please contact Kent Paulus at kpaulus@midmark.com or 937-526-8268.
