Oftentimes healthcare facilities are forced to choose between medical function and aesthetics when it comes to the clinical space. At Midmark, we believe you shouldn’t have to sacrifice one for the other. That’s why we designed our full line of cabinetry to improve upon the look, feel and function of the medical space.
Healthcare is evolving at a rapid pace, creating a unique set of challenges for healthcare systems. Managing the diverse needs of patients and providers can be tough. Whether you’re challenged by the integration of new technology, improving workflow, better space/equipment utilization, managing patient volumes or the influx of outpatient procedures, we can help you. It all starts with a better space and a better design.
Let’s design a better medical environment.

Maximize space, optimize workflow + complement your infection control protocol

Synthesis® Cabinetry by Midmark is designed from the inside out to improve the function of the clinical environment. Every component is designed to work together for a more safe and efficient care zone. See some of the designs and materials that help make this happen.

THERMOFOIL PANELS
Seamless panels are designed to resist spills, chemical degradation and delamination.

DRESSING NOOK
Privacy and storage in a small, easily cleaned space.

GLOVE, CUP + TOWEL DISPENSER
Efficiently organize and store products up and out of the way.

TOE KICK
4.25” tall toe kick allows physician seating to roll underneath cabinet doors and drawers.

NARCOTICS CABINET
Securely store supplies with two-person accountability.

SEAMLESS DRAWERS
Seamless, one-piece polystyrene drawers with rounded corners can help contain spills and be easily cleaned.

GLOVE, CUP + TOWEL DISPENSER
Efficiently organize and store products up and out of the way.

ADA OPTIONS
ADA-compliant, front-approach sink units help accommodate patient and provider needs, regardless of mobility limitations or devices.

Protect your patients + staff with products that support your infection prevention efforts.

The Synthesis Cabinetry Collection by Midmark is designed with features that can complement your organization’s infection control process, including EPA-registered*, anti-microbial pulls and surfaces, seamless panels and one-piece tub drawers.

SEAMLESS DRAWERS
Seamless, one-piece polystyrene drawers with rounded corners can help contain spills and be easily cleaned.

ANTI-MICROBIAL PULLS + COUNTERTOPS
EPA-registered*, anti-microbial pulls and biocidal surfaces can complement infection prevention measures.

*EPA Registration Numbers: BW-01 and BW-TU-001
Optimize the space you have + improve access to supplies.

In a perfect world, we’d always have just the right amount of space to accommodate all our needs. In the real world, we have to make do with the space we have. At Midmark, we see this as more of an opportunity than a problem. We’ve taken a two-fold approach to space optimization with flexible designs that maximize floor space and help improve accessibility to necessary supplies.

MAXIMIZE STORAGE
Specialized designs help eliminate dead space and improve supply organization. Sturdy, full-extension slides allow you to use all available drawer space, including hard to reach spaces in the back.

TRADITIONAL LAYOUT
Standard floor-mounted base cabinets are traditionally 24 inches deep with additional items like glove and towel dispensers mounted to the side of the casework. This takes up floor space and can add steps to the workflow.

THE TRADITIONAL REIMAGINED
Wall-mounted sink cabinets and mobile carts keep casework off the floor for cleaning and flexibility. Mobile carts help decrease the number of steps in the room by bringing supplies to the point of care.

Efficient Care Zone
A mobile supply cart with well-organized drawers can be retrieved from a dock in the adjacent cabinet to be in close proximity to the care zone. The supply cart can also serve as an additional work surface, positioned left or right of the caregiver.

Maximize Flexibility
Bring supplies to the point of care with versatile, mobile cabinet and treatment systems.

Accessible Supplies
When + where you need them

Better access to supplies is a must in an efficient medical environment. Integrating more specialized storage options helps make the most of available space, giving you access to the supplies you need when and where you need them most.
Configure your space the way you want it, as many times as you’d like.

In a rapidly evolving healthcare environment, one thing remains constant—change. For this reason, flexibility to recreate your space is not just a nicety, it’s a necessity. The Synthesis® Cabinetry Collection by Midmark is designed from the inside out with the flexibility needed to accommodate the continually evolving needs of the medical space.

External flexibility with a solid foundation
Healthcare changes, practices grow and move—oftentimes you are forced to choose between flexibility and style. Not anymore. Synthesis cabinetry is designed to be easily reconfigured to meet your changing needs.

Internal flexibility in a simple design
Choose from many component, storage and style options designed to allow you to configure a space that fits your workflow today and can be easily updated for the future.
Cabinetry designs that stand the test of time

Common wood cabinetry breaks down under repeated medical use. Why? Because most wood cabinetry wasn’t designed to withstand the rigorous demands of the medical environment. The Synthesis® Cabinetry Collection by Midmark is built to stand the test of time, excelling in even the most demanding clinical spaces.

**SEAMLESS POLYSTYRENE DRAWERS**
Rounded corners and one-piece construction help contain spills and can be easily cleaned in the back.

**SEAMLESS THERMOFOIL PANELS**
Seamless panels are designed to resist spills, chemical degradation and delamination.

**STEEL-ON-STEEL CONSTRUCTION**
The steel powder-coated structure serves as a durable foundation for the strenuous functional demands of medical cabinetry.

**SCREW WITHDRAWAL STRENGTH**
- Standard wood screw in 3/4” particle board core with melamine face
- Machine screw in 18-gauge steel
- Machine screw in 18-gauge steel with Nutsert®

*Percent stronger

Hardware failure typically happens when the substrate in which the hardware is fastened to fails. Because Midmark uses a steel-on-steel design vs. steel to wood used in millwork, our slide attachments (A) are designed to be stronger, giving our slides more withdrawal strength. Hinges stress the substrate even more, so we added Nutsert® to strengthen the door attachment points (B).

Architectural Resources + Design Options
Planning + design considerations

We can help make the planning and design of your space easier with the architectural resources you need right at your fingertips. You will find Revit files, technical drawings, approval numbers, dimensions, guidelines and more. Visit our Design Center at: midmark.com/medical/design-center

Designing a safer working environment together.

Our unique product attributes have been designed to assist you in obtaining credits within the LEED® family of rating systems. We choose to be proactive because we know that LEED contributes to healthy environments through improved air quality and we want to be your partner in the facilitation of a better working environment. Midmark cabinetry can contribute to specifier strategies and LEED credits that can impact building certification including water efficiency, construction waste management, material reuse, recycled content, local/regional materials and low-emitting materials. Please see the comprehensive list of credits below.

Choose a style that complements your unique brand.

The Synthesis® Cabinetry Collection by Midmark includes many styling options including colors, finishes and other elements designed to allow you to put your unique signature on a space, whether one room or a network of facilities, for a consistent brand perception.

Styling options to create a unique look and feel
Distinguish your space with color.

Color is an important part of establishing your distinct brand. It’s more than visual appeal. Color can transform your space into something you won’t just see, but you will feel, too. Although there is no direct link between specific colors and health outcomes, colors can influence how patients experience the space. Soothing tones and textures can aid in creating an environment that feels less clinical and more inviting.

COLOR OPTIONS

- Dune 794
- Flax 795
- Nest 796
- Path 798
- Hewn 797
- Radiance 800
- Acorn 459
