

Synthesis® Casework Collection

Mobile Treatment Cabinets

Make the most of the space you have

In a perfect world, we'd always have just the right amount of space to accommodate all of our needs. In the real world, we have to make do with the space we have. Midmark Synthesis® mobile treatment cabinets are designed to be a flexible, efficient and aesthetically pleasing storage option. Our designs allow you to have easy, direct access to supplies where you need them most without taking up valuable floor space in the care zone when not in use.

Accessible Supplies

Easy access to supplies is a must in an efficient medical environment. We've created specialized designs to eliminate dead space and improve organization so you have easy access to supplies when and where you need them.

Flexible Storage

Designed to work together with other equipment in the room, the mobile treatment cabinet can enhance the overall effectiveness and efficiency of the medical space. Bring the supplies you need to the point of care with versatile, mobile cabinets and treatment systems. And when you don't need them, they can be easily stored out of the way.
