IQvitals® can be used as a standalone device, connected to a computer using IQmanager® software or connect seamlessly to many leading EHR/EMRs. The intuitive user interface helps increase productivity, reduce errors and simplify staff training. Take your practice to the next level with Midmark IQvitals®.

The path to better care begins with vitals.

Vitals are the beginning of the patient-caregiver interaction. They provide critical information related to changes in patient health and play an important role in a physician's treatment decisions. The integration of EMRs, new technologies and automated devices has a significant impact on the overall ease and efficiency of the process. So why are we still using the same vitals process we have been for the past 30 years?

It's time for a change.
