

MEDICAL

630 HUMANFORM[®] Procedure Chair

Healthcare is changing. Are you changing with it?

Healthcare has been changing at an unprecedented rate. There are more patients, fewer providers, and patients are trending away from hospitals into office settings. Having the right combination of technology and workflow is more important now than it ever has been.

Position yourself + your patients for **in-office procedures**

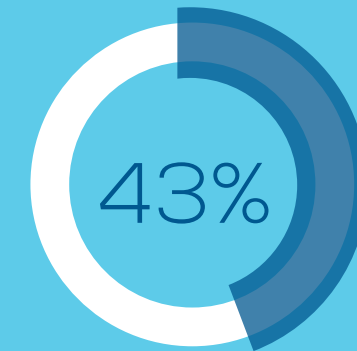

Close to half of all procedures in the US are now performed in the office setting.¹ With advancements in technology, anesthesia and pain management, it is expected that the number of procedures being performed in an office setting will continue to rise.² Is your facility equipped to handle this migration of care?

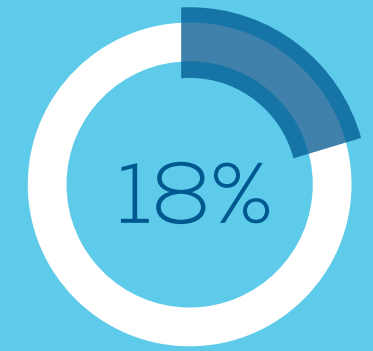

In-office procedures are on the rise

60
million

The number of in-office procedures performed in 2024.¹

In 2024, nearly half of all procedures in the US were performed in the office setting.¹

The estimated increase in the volume of in-office procedures by 2032.²

MIDMARK CAN HELP

The Midmark 630 HUMANFORM® Procedure Chair is designed with precise positioning and more humanlike movement to provide better accessibility and ergonomics for patients and caregivers.

Bringing patient + provider together comfortably + safely

Since the inception of the Americans with Disabilities Act (ADA), accessibility has become a legal requirement. But more importantly, accessible design is instrumental in providing better care.

The Midmark 630 HUMANFORM® Procedure Chair can lower to a height of 19" (non-rotational models) and can be moved into a low, flat position. The low seat height and wide, flat transfer surface can help enable patients to transfer onto and off of the procedure chair with minimal assistance, improving safety for the patient and caregiver.

Natural, humanlike movement
patients will appreciate

01 BARRIER-FREE DESIGN

helps address the needs of a changing patient demographic with a 19" low seat height and 650-pound weight capacity.

02 MOTION PROFILING®

adjusts the chair as the patient moves to help maintain head and back support. This exclusive feature is designed to eliminate the need for patients to reposition as the chair back section raises or lowers.

03 FOOT EXTENSION

extends the chair footrest to accommodate taller patients with the touch of a button.

04 PREMIUM COMFORT SYSTEM®

combines unique, contoured upholstery and an adjustable footrest to cradle the patient for a soothing, chair-like feel.

Better position caregivers for in-office procedures

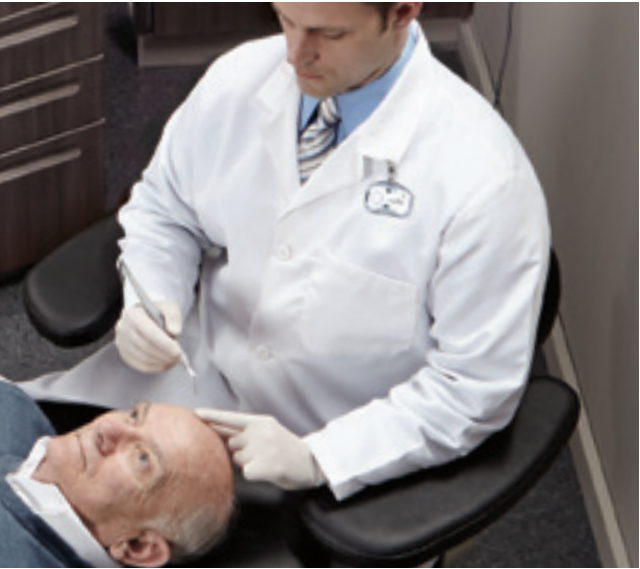

No matter the type of procedure, proper positioning is necessary for unobstructed access to the patient and a clear view of the surgical site. The Midmark® 630 has 8-way powered positioning (height, back, foot and tilt) giving caregivers the freedom to effortlessly move patients into the most effective positions.

1 out of 5

Of all injuries reported in the US is healthcare related.³

3x

Healthcare workers are almost three times as likely to suffer from work-related injuries than construction workers.³

CAREGIVER ERGONOMICS

When performing in-office procedures, it's important to choose a procedure chair that provides clear access to the patient and procedure site. But have you considered provider ergonomics? The Midmark 630 HUMANFORM® Procedure Chair is designed with features that help ensure ample access to the patient while maintaining a proper working position whether seated or standing.

PRECISE MEDICAL POSITIONING

LITHOTOMY

Position patients for lower-body procedures

ELEVATED FLAT

Can improve access and visibility to the patient's head, neck and torso

CHAIR ENTRY

Positions the patient in the upright position for entry and exit

TRENDELENBURG

Can be used as a first-line treatment of acute hypotension and shock

ADJUSTABLE HEADREST DESIGN

Articulating Headrest

Tilt the patient's head or adjust for different procedures, improving access and patient comfort.

Tool-Free Adjustment

Simply loosen the knob, rotate the headrest up or down and retighten.

Intelligent features make time with patients more efficient

With more procedures being performed in office settings and patient volumes on the rise, efficiency and comfort are more important than ever. The Midmark 630 HUMANFORM® Procedure Chair helps create a better care experience—for you and your patients.

Programmability
is positioning
made easy

The Midmark® 630 can store up to four of your most used positions. With the touch of a button, all sections of the chair move simultaneously to quickly and precisely move the patient to the desired position. (Programmability is an optional feature.)

MAKE THE MOST OF THE SPACE YOU HAVE WITH **ROTATION**

With the optional rotation feature, you no longer have to drag heavy devices around the chair or the patient. You can simply move the patient for better access.

DUPLEX RECEPTACLES

Hospital-grade, duplex receptacles on each side of the chair allow you to easily power ancillary devices at the point of care. (Not available on rotational or 230 V models.)

WIRELESS CONTROLS

Locate your optional wireless hand and foot control anywhere in the room without having to worry about trip hazards or cords. A low battery audible indicator will sound when it's time for a battery replacement.

ACTIVE SENSING TECHNOLOGY®

Avoid impact or disruption while moving the chair. Active sensing technology pauses chair movement when disrupting impact is detected.

Accessories

ACCESSORIES HELP ADD VERSATILITY + FUNCTION TO YOUR PROCEDURE CHAIR
