

RTLS for Contact Tracing + Temporary Hospitals

At Midmark, we believe that who's using our technology is every bit as important as how and why it's being used. We are here to support you through these difficult times. With the current influx of patients needing care and resulting pressure on frontline caregivers, real-time locating system (RTLS) technology can help by enabling staff with accurate contact tracing data and providing visibility to the real-time location of patients, staff and critical equipment (like ventilators and IV pumps) in the hospital. From traditional hospital facilities to temporary COVID-19 hospitals in tents or other re-purposed locations, Midmark RTLS can help staff provide efficient, effective care in this time of crisis.

Direct Contact			
Name	Badge Type	First Exposed	Total Exposure
Janet Anderson	LPN	02/03/2020 1:14PM	0:23
David Parker	MA	02/03/2020 1:26PM	0:13
Secondary Contact			
Name	Badge Type	First Exposed	Total Exposure
James Mayben	MA	02/03/2020 1:25PM	0:01
Kiyo Sato	Provider	02/03/2020 1:38PM	0:25
Amy Spencer	Provider	02/03/2020 1:39PM	0:01
Emiliano Ruiz	MA	02/03/2020 1:39PM	0:12
Jon Cassen	LPN	02/03/2020 1:42PM	0:02
Alexander Moore	RN	02/03/2020 1:47PM	0:10
Janet Sanders	RN	02/03/2020 1:47PM	0:01

Contact Tracing

With the Degree of Exposure and Location Activity reports included in our **Staff + Location Reports** package, health systems can almost instantly identify any and all badged staff and/or patients that have come into contact with a person or location known (or thought to be) a risk for pathogen exposure. This offers a powerful, invaluable safeguard if COVID-19 or another contagion enters your facility.

How to Get Started:

1. If you do not currently use RTLS reports but would like to:

- We are committed to deploying as soon as possible
- Staff + Location Reports software license fee is waived until June 1, 2020
- Contact your Midmark RTLS Certified System Integrator or Midmark representative to request a services assessment

2. If you have Reports Plus Analytics already installed for Staff Locating or Patient Flow Optimization:

[Consult our video tutorials](#) on Best Practices for Exposure Reporting

[Contact Midmark RTLS Technical Support](#) for assistance if needed

3. If you have Reports Plus Analytics already installed for Asset Tracking:

- We will switch on contact tracing reports at no charge if desired
- Contact Midmark RTLS Technical Support to see if this option is available for your facility

RTLS for Temporary COVID-19 Hospitals

We are currently prioritizing requests for real-time locating system (RTLS) installations in temporary COVID-19 hospitals. From tent hospitals to parking garages, hotels and conference centers, Midmark RTLS is servicing these critical caregiving spaces with the tools needed to get up and running quickly.

Our **Patient, Staff and Asset Locating** solution gives visibility to all badged people and tagged assets in the hospital or temporary care space, allowing for efficient communication between caregivers, as well as the ability to immediately locate critical equipment like ventilators and IV pumps.

In cases where the UL1069 requirement for nurse call systems has been waived, Midmark RTLS is also providing a **Patient Assist** solution using wireless push-button devices at the bedside, allowing patients to call for a nurse. Calls are delivered to workstation computers deployed in each unit, with options for clearing calls at the computer or also at the bedside.

Emergency RTLS Badge Orders

If you need to badge additional staff and/or patients to assist with contact tracing efforts or to set up a temporary hospital, we have increased our inventory to meet demand. To help us ensure that we can serve all customers, please contact your Midmark RTLS Certified System Integrator or Midmark representative as soon as possible if you plan to order additional badges.
