

Synthesis[®] Casework Collection by Midmark

The Synthesis® Casework Collection by Midmark—beauty and purpose by design

Since the moment Midmark entered the medical industry over 40 years ago, helping advance patient care has been our passion. Today, our number one commitment is bringing you solutions that will help you do what you do best—care for your patients.

The Synthesis® Casework Collection by Midmark was created to bring the best of two worlds together—medical casework completely redesigned from the inside out to be functional and stylish. In the past, this has oftentimes meant sacrificing beauty for designs that are more practical for medical environments. Those days are over. Because, at Midmark, we believe that you shouldn't have to sacrifice one for the other.

Address the unique requirements of the medical space

Clinical work is highly specialized and, at times, hectic. Caregivers need a space that is designed to accommodate the rigors of their daily routine. Create a clinical environment that will function the way you need it and be durable enough to meet your needs both today and tomorrow. The Synthesis® Casework Collection by Midmark is specifically designed to:

- maximize your space
- have the options you need to meet workflow requirements and compliance regulations
- be flexible enough to grow as needs change
- complement your infection control protocol

Dressing Nook
Maximizes privacy and storage in a small, easy-to-clean footprint.

Narcotics Cabinet
Narcotics cabinet allows for two person accountability and aesthetically matches the adjoining casework.

Glove, Cup and Towel Dispenser
Designed to maximize the efficiency of product storage with a handle width designed to fit the 95th percentile male hand.

Toe Kick
4.25" tall toe kick allows Midmark physician stools to roll underneath cabinet doors and drawers without marring surfaces.

ADA Options
Accommodate provider and patient needs. (Shown: Casework and countertop at ADA-recommended height.)

Protect your patients and staff

Midmark can help.

The Synthesis® Casework Collection by Midmark is designed with features intended to complement your facility's infection control process, including EPA-registered*, anti-microbial pulls and surfaces, seamless panels and one-piece, tub-style drawers.

Thermofoil Panels
Seamless panels provide a surface that is designed to resist spills, chemical degradation and delamination.

Seamless Polystyrene Drawers
Seamless polystyrene drawers with rounded corners and one-piece construction are designed to contain spills, be easily and effectively cleaned, and handle the daily rigors of the medical environment.

Anti-microbial Pulls and Countertops
EPA-registered*, anti-microbial pulls and preventative biocidal surfaces help complement your current asepsis procedures.

*EPA Registration Numbers 84542-7 and 087753-CT-001

Traditional Layout

Standard floor-mounted base cabinets are traditionally 24 inches deep, and additional items like glove and towel dispensers are mounted to the side of the casework. This takes up precious floor space in the room and adds additional steps to the workflow.

Rethink the Traditional

Wall mounted sink cabinets and mobile carts keep casework off the floor for ease of cleaning and flexibility. Mobile carts help decrease the number of steps in the room by bringing supplies to the point of care. And by integrating items like gloves and towels, additional steps may be eliminated.

Accessible Supplies

When and where you need them.

Easy access to supplies is a must in an efficient medical environment. Integrating more specialized storage options helps make the most of available space, giving you easy access to supplies when and where you need them.

Optimize the space you have and improve access to supplies

In a perfect world, we'd always have just the right amount of space to accommodate all of our needs. In the real world, we have to make do with the space we have. At Midmark, we see this as more of an opportunity than a problem. We've taken a two-fold approach to space optimization, creating flexible designs that maximize floorspace and improve accessibility to necessary supplies.

Maximize Space

Full extension slides are designed to be sturdy and allow you to use all available drawer space, including hard-to-reach spaces in the back.

Maximize Efficiency

We've created specialized designs to eliminate dead space and improve the organization of supplies.

Maximize Flexibility

Bring supplies to the point of care with versatile, mobile cabinets and treatment systems.

Configure your space the way you want it, over and over again

In a rapidly evolving healthcare environment, one thing is constant—change. For this reason, flexibility to create the most efficient space now and into the future is not just a nicety, it's a necessity. The Synthesis® Casework Collection by Midmark has been completely redesigned from the ground up to provide optimal flexibility for the changing healthcare environment.

External flexibility with a solid foundation

Healthcare changes, practices grow and move—oftentimes you must choose between flexibility and style. Not anymore. The Synthesis® Casework Collection by Midmark is designed to provide you with external flexibility that is quick and easy to reconfigure.

Internal flexibility designed to be simple

Choose from multiple component, storage and style options designed to allow you to configure a space that fits your workflow today, but can be updated in the future.

Invest in a casework solution that stands up to the demands of a healthcare facility

Common wood casework breaks down under repeated medical use. Why? Because it wasn't designed to withstand the demands of medical facilities. The Synthesis® Casework Collection by Midmark is designed to excel even in the most demanding environments.

Seamless Polystyrene Drawers

Rounded corners and one-piece construction, designed to contain spills and be easily cleaned.

Seamless Thermofoil Panels

Seamless panels provide a surface that is designed to resist spills, chemical degradation and delamination.

Steel-on-steel Construction

The steel powder-coated structure serves as a durable foundation for the strenuous functional demands of medical casework.

Screw Withdrawal Strength

*Percent stronger

Hardware failure typically happens when the substrate in which the hardware is fastened to fails. Because Midmark uses a steel-on-steel design vs. steel to wood used in millwork, our slide attachments (A) are designed to be stronger, giving our slides more withdrawal strength. Hinges stress the substrate even more, so we added Nutserts® to strengthen the door attachment points (B).

- Standard wood screw in 3/4" partial board core with melamine face
- Machine screw in 18-gauge steel
- Machine screw in 18-gauge steel with Nutsert®

Rely on our expertise and experience in the medical space

As healthcare evolves, it brings with it a unique set of challenges. At Midmark, we know that managing diverse patient volumes and needs can be tough. We can help you find a specialized solution designed to address changing needs while controlling costs and maintaining a high level of patient care.

Whether you're facing the integration of new technology, incorporating leaner workflows or trying to manage the increase of in-office procedures, we can help.
