CO_2 Sensor Best Practices

midmark™
*Designing better care.*

ALWAYS

"Zero" the CO_2 sensor after a new adapter or filter line is installed

NEVER

"Zero" a sensor without an adapter or filter line installed

"Zero" a sensor that is in use or attached to a patient

DISPOSE **FREQUENTLY**

Filter Line

Adapter

Choose the Right Adapter or Filter Line

PEDIATRIC ≤4.0 ET Tubes

ADULT ≥4.5 ET Tubes

"Zero" the CO_2 Sensor*

1. Plug the CO_2 sensor into the Midmark Multiparameter Monitor.

2. Install the airway adapter or filter line.

3. Select the CO_2 waveform or CO_2 data in the parameter box to enter the CO_2 Setup Menu.

4. Once the module is warmed, press "CO_2 Zeroing" or "Start Zero Calibration".

5. Upon successful completion, the status bar will display the message "CO_2 Zero Successful".

*These steps are specific to zeroing Respironics CO_2 sensors.
