

MECHANICAL VENTILATION 101

2 HOURS RACE[®] CE
Add-On Lab

Extend your training! This exclusive add-on is an excellent opportunity to deepen your in-clinic training with focused, hands-on ventilator experience.

This course is designed to help veterinary teams better understand their anesthesia ventilator and build confidence in setup, controls, alarms and use through hands-on learning. It introduces the need for mechanical ventilation and emphasizes the role of capnography, providing a strong foundation to support patient safety and promote positive outcomes.

Your Midmark training specialist will:

- Explain the uses and benefits of mechanical ventilation during anesthesia.
- Demonstrate ventilator setup, controls and alarm functions.
- Highlight capnography's role in supporting mechanical ventilation.
- Guide hands-on ventilator practice in a dry lab environment.

TRAINING COURSE: VI-AMT-ADD

This training is an add-on course to Anesthesia Monitoring 101 or 201 courses: (VI-AMT or VI-AMT2)

Veterinarians and credentialed technicians who complete this session will earn 2 RACE-approved CE hours.*

Class size is limited to ten attendees, and one attendee **MUST** be a veterinarian.
