WE BELIEVE WHO’S USING OUR EQUIPMENT IS JUST AS IMPORTANT AS HOW AND WHY IT’S BEING USED.

From the moment Midmark entered the dental industry, helping advance patient care has been our passion. Today, our number one commitment is helping you and your team focus on what you do best — caring for your patients, from the operatory to the mechanical room.

Midmark mechanical room solutions are designed to keep your practice up and running so you can deliver high-quality care in the way that works for you.
A Critical Life Source to Keep Your Practice Up and Running

Dental air compressors and vacuums make up your mechanical room’s clinical equipment. They are the heart and lungs that breathe life into your handpieces and ensure saliva and other liquids are comfortably and safely evacuated from your patient’s mouth. From wet-ring vacuums to oil-less dry vacuums and air compressors, Midmark mechanical equipment can be expanded to grow with your practice and meet your needs today and into the future. Our premium products and superior performance help ensure your practice stays up and running so you can focus on what matters most… your patients.

28 What You Get with Midmark
The Heart and Lungs of Your Dental Practice

Your patients can’t see it, but air compressor and vacuum equipment are vital to patient care and office productivity. If a unit goes down, you can experience hours or days of downtime during which you cannot take care of your patients. This results in loss of revenue and creates a poor patient experience. Ensuring you have the right, high quality dental equipment and preventative maintenance practices in place is key to reducing risk to your practice.

SOLUTIONS TO IMPROVE QUALITY AND WORKFLOW

01 High-performance equipment provides confidence that your handpieces will operate efficiently.

02 Durability and quiet operation are provided by the PowerVac® with high-performance, industrial-grade rotary-claw pump technology and an integrated silencer to meet the vacuum needs of dental practice.

03 A leading product warranty provides doctors with the peace of mind that their equipment will last.

04 PowerAir® is designed to provide the ultimate in clean air, capturing 99.9997% of compressed air contaminants and providing ultra-dry air for your critical dental procedures to ensure a safe environment.

05 Get proven technology in Midmark dental air compressors and vacuums which are easy to install and require little to no maintenance.
Function and Efficiency
You Can Count On

Our technology and equipment are designed to improve patient interactions and deliver a high quality of care. Considering your practice size and needs, Midmark dental air compressors and vacuums can be configured based on number of users to meet your practice needs now and grow with you into the future. Equipment that can save on maintenance and utility costs puts money back into your business and allows you to think about your patients first.

SOLUTIONS FOR PRACTICE FLEXIBILITY AND EFFICIENCY

01 Upgradeable flexibility with PowerVac and PowerVac G can accommodate 1-20 users for your practice needs now and into the future.

02 Pair a Midmark vacuum and compressor for industry-leading performance that can be expanded as you grow.

03 Produce only the vacuum you need when you need it with the innovative PowerVac G.

04 High-quality, cost-effective options with the ClassicSeries® wet-ring vacuums, allow you to have a high level of patient care, while not breaking the bank.

05 Efficient energy control with the PowerVac G uses up to 83% less electricity than competitive systems allowing you to save money on your utilities.
Keep Your Practice Humming Along

If your mechanicals aren’t working, your practice isn’t working. Whether you operate a small, medium, or large dental practice, ensuring you have the right sized equipment to meet demand is critical to avoid excess heat, premature wear to the equipment, and inefficient handpiece performance. And this is just half the story; having good preventative maintenance practices in place protects your investment to keep your practice running and your patients comfortable.

SOLUTIONS FOR OPERATIONAL EFFICIENCY

01 Unlike competitive dry vacuums with oil in exposed areas and annual oil and filter change requirements, the PowerVac and PowerVac G are virtually maintenance-free with a sealed crankcase and no oil change needed for up to 10 years. Simply inspect and clean for best performance.

02 Reduce motor wear and tear with the PowerVac twin 200 CFM fan to keep it cool and increase the performance of your equipment.

03 Multiple clinical grade options for air and vac are available to meet your unique practice needs—from efficient wet-ring and dry vacuums, to specialized vacuums and powerful air compressors to meet needs.

04 Wet-ring vacuums and compressors are easy to maintain.

05 Aftermarket sales and technical support are ready to assist you when you need us.
Things To Consider

What’s important to you? We’re not just asking about mechanical equipment types and sizes, but also how do you want to practice? It’s a good idea to begin thinking about what you want and need for your operatories to be effective and make the delivery of care more efficient. Based on years of observing the clinical space, we have one basic recommendation: Consider mechanical equipment not just for how your operatories function today, but consider how you want to work and grow in the future.

FIRST THINGS FIRST

Grab a pen and answer these initial questions:

1. What is the cost of downtime to your practice?

2. How is your mechanical room equipment working for you today?

3. How has your practice grown or changed since you purchased your current vacuum and compressor?

4. How is your level of suction? What happens to the suction when multiple operatories are working?

With 1 being the highest and 7 being the lowest, rank in order the importance of the following when considering mechanical equipment in your future operatory design.

- Durability and Longevity
- Energy Savings
- Cost Effectiveness
- Noise Level
- Space Requirements
- Suction
- Maintenance

A LITTLE MORE DETAIL

1. What type of dentistry do you practice?
   - General Practice
   - Oral Surgery
   - Specialty
   - Other

2. Where is your mechanical room equipment currently located?

3. Is noise an issue in the current location?
   - Yes
   - No

4. What are the dimensions of your mechanical room? (Ideal size is 10’ W x 12’ D x 9’ H)
   - Op Depth:
   - Width:
   - Height:

5. How do you anticipate your practice will grow in the future?

6. How old is your current vacuum and air compressor?
   - 0-2 Years
   - 3-6 Years
   - 7-10 Years
   - 10+ Years

7. How many service calls have you had for your vacuum or compressor since its purchase?
   - 0-2
   - 3-5
   - 6-10
   - Over 10

8. What type of vacuum do you use?
   - Wet-rin
   - Dry Vac

9. What are the energy and water saving goals for your practice?

10. How are your handpieces holding up?

11. What types of issues have you experienced with composites bonding?

12. What is your backup plan if your current vacuum or compressor quit today?

13. Are there any local codes/regulations we need to help accommodate?
   - Yes
   - No
   If yes, please explain.

14. How many operatories do you have?

15. Is there any other equipment your operatory needs to accommodate?
“I’m thrilled with the cost savings, thanks to the PowerVac G. We cut our electric usage by 30 percent, water usage by 50 percent and sewer cost was down 40 percent. This entire savings and no reduction of suction performance in any of our 13 operators.”

Jill Nesbitt
Practice Administrator, HealthPark Dentistry
# PowerAir Oil-Less Air Compressors

Midmark PowerAir oil-less dental compressors satisfy the high standards demanded by today’s dental professionals. Our compressors provide one of the highest cubic feet per minute (CFM) of compression on the market, while filtering out 99.9997% of compressed air contaminants. With quiet operation and an unmatched, exclusive 5-year product warranty, you can be confident of reliable operation for years to come.

### Features
- Industry-leading performance
- 0.01-micron coalescent filter designed to provide the ultimate in clean air, generating the capacity to capture 99.9997% of compressed air contaminants
- Quiet operation
- 5-year/3,500-hour product warranty

### Sound covers (optional) allow for quiet compressor operation and include high-output cooling fans and quick-connect electrical plug.

### In compliance with NFPA 99 category 3 standards, all PowerAir oil-less compressors include a 0.01-micron coalescent filter to provide ultra-clean air.

### A unique exhaust silencer/filter is designed to keep noise levels low, and filters purge air to a nearby drain for a cleaner mechanical room environment.

### Simple and effective, the service access manifold houses all critical compressor operating controls in one convenient location.

### HOW BIG IS A MICRON?

When imagining the size of a micron, think of it like this: The large circle represents the size (O.D.) of a single human hair. The smallest dot represents one micron, or 1/1,000 of a millimeter. Midmark PowerAir oil-less compressors utilize a 0.01 micron coalescent filter.
The Midmark PowerVac is the first dry vacuum to combine the advanced features your dental practice demands into one flexible, performance-driven system. The PowerVac creates a new standard for dental dry vacuums with exceptional power and performance.

**Features**
- Oil-less and water-less design
- Quiet operation
- Consistent high performance – up to 18” Hg
- Compact design uses similar floor space as conventional wet-ring vacuums
- Can replace many types of existing vacuum technologies, regardless of plumbing configuration
- Upgradable flexibility – can accommodate 1-20 users
- Unmatched product warranty – 5-year/10,000 hour full product; 10-year/20,000 hour pump warranty

The PowerVac's unique pump has an integrated silencer to reduce the noise level, making it one of the quietest dry vacuums on the market.

Exclusive, heavy-duty casters make moving and maneuvering the PowerVac easy. The adjustable leveling feet keep it level even on irregular surfaces.

Twin 200 CFM fan keeps the PowerVac cool, which helps reduce wear and tear on the motor and other internal components.

Plug and play hose connections mean there are no tools required for installation.

**Greater Cost Savings Over Traditional Wet Ring or Dry Vacuums**

PowerVac G Dry Vacuum

The Midmark PowerVac G provides on-demand energy management that creates a new standard for dental vacuums. Many vacuums operate at full force regardless of demand. The PowerVac G automatically increases the pump speed to match demand, maintaining a constant vacuum level and giving you exactly the vacuum you need, no more and no less.

Features
- Same features as the PowerVac with additional benefits
- Efficient energy control – uses up to 83% less electricity than competitive systems
- Significant heat reduction – reduces heat emissions by up to 30%
- Whisper-quiet operation – as low as 48 dBA
- Consistent high-performance – up to 18” Hg
- Upgradable flexibility – can accommodate 1-20 users
- Unmatched, product warranty – 5-year/10,000 hour full-product; 10-year/20,000 hour pump warranty

The PowerVac G has a super-capacity separator large enough to meet the needs of most offices.

MIDMARK POWERVAC G SPECIFICATIONS

*2000 hours/yr using a Twin 1-HP pump. Includes costs for water, electricity and maintenance items.
ClassicSeries Wet-Ring Vacuum

Midmark ClassicSeries wet-ring vacuums allow dental offices to deliver dependable performance with a space-saving, compact design. Enjoy the best features and proven technologies of our original, trusted machines in one integrated offering.

Features
- High output, proven performance
- Durable aluminum bronze construction
- Internal water recycling
- Water recycling by-pass
- Sound-reducing mufflers
- NFPA 99 level 3 compliant
- UL/CUL classified
- 100% long term burn-in testing
- Unmatched, product warranty – 5-year/10,000 hour full-product warranty

Redesigned intake manifold allows for smooth air flow and greater efficiency. Separate twin model on/off switches and hour meters provide operational versatility. Water recycler bypass valve provides extra protection against water mineral deposits.

Performance You Can Trust.

Midmark PowerMax™ High Performance Vacuums are designed to satisfy the needs of dental specialists who demand the highest performance from their vacuum systems. Unlike typical dental vacuum systems that must continuously operate in order to provide instantaneous chair-side suction, the PowerMax operates only when the supply tank is lower than the chair-side vacuum demand, saving electricity and helping to promote the overall longevity of the system. This vacuum comes standard with an easy to read vacuum gauge, vibration isolating feet and 24 V low voltage operation for added convenience. For added value, combine the PowerMax vacuum with the optional recovery room package for in-room containment and procedure monitoring of oral cavity waste.

**PowerMax High Performance Vacuum**

**Maximum Suction - Efficient and Reliable**

**PowerMax High Performance Vacuums**

- Vacuum power of up to 21” Hg
- Oil-less rotary-vane vacuum pump provides exceptional reliability
- ASME-certified vacuum supply tank
- NFPA 99C level 3 compliant
- UL/ULc-classified
- 2-year product warranty

**PowerMax Vacuums produce high performance suction – up to 21” Hg.**

**Combine the optional operatory recovery room package for in-room containment and procedure monitoring of oral cavity waste.**

ENRICHING THE POINT-OF-CARE EXPERIENCE
When you choose Midmark, you get so much more than a product. You get a partner with decades of hands-on manufacturing expertise, inspired design innovation, and landmark thought leadership in workflow efficiency to improve the point-of-care experience for your patients. Midmark continues its long tradition of improving patient care by infusing function-forward design, relentless quality and thoughtful technology into every product. And with an extensive warranty and dedicated technical support, we’re right by your side the moment you need us.

WARRANTY AND SERVICE
We stand by the quality and reliability of our products - that is why we offer limited warranties on all of our air compressor and vacuum equipment purchased through an authorized Midmark dealer. Refer to pages 14-22 in this brochure for warranty specifics by brand. In addition to warranty, Midmark has a large team of expert customer experience and technical support representatives that will assist you with any product questions regarding installation and service.
DESIGNING BETTER CARE.
We believe better care starts with a better designed care environment. Midmark offers a complete solution set for your clinical space. Let us help you bring your dental practice vision to life.
