WE BELIEVE WHO’S USING OUR EQUIPMENT AND TECHNOLOGY IS EVERY BIT AS IMPORTANT AS HOW AND WHY IT’S BEING USED.
From the moment Midmark entered the dental industry, helping advance patient care has been our passion. Today, our number one commitment is helping you and your team focus on what you do best — caring for your patients, from the operatory to the mechanical room.

Midmark imaging solutions drive diagnostic accuracy, which in turn helps you deliver a successful treatment plan and bolster confident interactions with patients.
Optimal Patient Care Begins With Quality Imaging

When you look for the factors that drive optimal patient care in your practice, consider the pivotal role of your imaging capabilities.

Clear, accessible images serve as powerful patient education tools for better compliance. And with lightning-fast results supported by digital image capture and connectivity, your patients don’t have to wait, and neither do you. At the end of the day, diagnostic excellence brings peace of mind to both you and your patients, and it all begins with quality imaging.
EXPERIENCE IMAGE CLARITY

With innovative technology from Midmark, you can get flawless image clarity through our intraoral and extraoral imaging products to meet practice needs. Image clarity enables dentists to effectively and quickly make diagnoses and develop treatment plans. With chair-side viewing of X-rays, patients can quickly understand their diagnoses which builds confident doctor-patient interactions. Choose from a range of X-ray options including panoramic, cephalometric, intraoral and digital sensors. All Midmark imaging equipment uses state-of-the-art technology and integrates easily into most practice management software systems.
Optimal-dose settings are available to ensure patient safety and the sharpest images through the Vantage Digital Panoramic and Preva X-ray systems.

Midmark provides easy-to-use positioning tools, including panoramic remote support and training for your staff through Vantage Trust®.

Enjoy peace of mind with the Sensor Safe® extended care and replacement program to protect your ClearVision® sensor investment.

Easy to use tools for proper positioning are important to ensure the best image quality for diagnosis.
Flexible Options for a Better Patient Experience

Our technology and equipment is designed to help ensure a safe and efficient environment that fosters the caregiver-patient interaction and is conducive to the delivery of high-quality care.

SOLUTIONS FOR PRACTICE FLEXIBILITY AND EFFICIENCY

Digital integration for today or in the future is possible with the Preva systems which can incorporate a high-speed digital USB hub or come already integrated with our ClearVision® sensor based on your practice needs.

Patient comfort is maximized with the ClearVision sensor’s thin profile and rounded corners. Available in two sizes to accommodate adults and children.

Upgrade as you grow with a cephalometric attachment as the needs of your practice change.

OPTIONS TO FIT YOUR SPACE

We have options to fit your space with intraoral systems that include multiple arm lengths and fixed mounted or mobile options, and a CR reader with a small footprint that can fit where you need it.

OPERATORY WITH PREVA PLUS IMAGING UNIT
Chair: UltraTrim®
Stools: Dentist’s and assistant’s stools
X-ray: Preva Plus mounted in central station
Cabinetry: Artisan Expressions treatment station and central station

COLORS
Cabinet: Prestige Walnut
Resin: Mirage Bronze
Countertops: Canyon Corian® Solid Surface
Upholstery: Dusk Ultraleather®
Wall: Argos SW7035

Patient comfort is maximized with the ClearVision sensor’s thin profile and rounded corners. Available in two sizes to accommodate adults and children.
PRODUCTS DESIGNED TO WORK THE WAY YOU DO

BETTER CARE HAPPENS BY DESIGN

Our workflow solutions focus on the operational and clinical aspects of work and patient flow, enabling your entire space to be designed around the caregiver-patient interaction. Midmark can help you create the right clinical work environment for advancing patient care and improving office efficiency.

OPERATORY WITH MOBILE PREVA IMAGING UNIT

Chair: UltraTrim Stool; Dentist’s stool
Unit: Asepsis 21® left-right delivery Unit, chair-mounted rear Assistant’s Unit
Light: Ceiling-mounted halogen
X-ray: Preva Mobile, ClearVision CR Reader and plate storage box
Cabinetry: Synthesis® treatment station, side cabinet and dispenser

COLORS

Cabinet: Timber
Countertops: Lava Rock Corian® Solid Surface
Upholstery: Dove Grey Ultraleather®
Wall: Argos SW7065
Floor: BerryAlloc® DreamClick Pro River Oak Greige
SOLUTIONS FOR STREAMLINED WORKFLOW

01 Work faster and smarter with Progeny® Imaging Software to get you to a diagnosis more efficiently so you can get back to your patient. Standard with all Midmark imaging equipment.

02 Intuitive interfaces are built into the Preva, ClearVision® CR and Vantage Digital Panoramic systems making them easy to operate.

03 Patient-side viewing on your monitor is easy with crisply detailed digital images providing improved patient engagement and efficient patient flow.

04 Preprogrammable exam settings on the Preva and Progeny Vantage Digital Panoramic systems are designed to improve the way you work by minimizing exam setup time.
Things to Consider

What’s important to you? We’re not just asking about radiographic techniques. How do you want to practice? It’s a good idea to begin thinking about what imaging capabilities you want and need to be effective and make your delivery of care more efficient. Based on years of observing the clinical space, we have one basic recommendation: Design not just for how your clinic works today, but how you want to work in it and the environment you want to create for the future.

FIRST THINGS FIRST
Grab a pen and answer these initial questions:

1. What do you like about your current imaging equipment?

2. What do you want your imaging equipment to be able to do that it cannot do today?

3. What aspects of your current imaging equipment do not allow you or your staff to work efficiently?

4. What do you want your clinical space to convey to your patients about you, and how does their experience of your imaging capabilities fit into that?

With 1 being the highest and 7 being the lowest, rank in order the importance of the following when considering your future imaging center design.

<table>
<thead>
<tr>
<th></th>
<th>Durability and longevity</th>
<th></th>
<th>Patient comfort</th>
<th></th>
<th>Image clarity</th>
<th></th>
<th>Efficient patient flow</th>
<th></th>
<th>Technology integration</th>
<th></th>
<th>Aesthetics</th>
<th></th>
<th>Cost effectiveness</th>
</tr>
</thead>
</table>

A LITTLE MORE DETAIL

1. What type of dentistry do you practice?
   - General Practice
   - Orthodontics
   - Oral Surgery
   - Endodontics
   - Periodontics
   - Prosthodontics
   - Specialty
   - Other

2. What type of room design concept do you prefer?
   - Closed Room
   - Open

3. If closed room, how many entries?
   - One
   - Two

4. Do you have future expansion plans for your practice?
   - Now
   - 1-2 Years
   - 3+ Years

5. What will be the size of your future operatories?
   (Ideal size is 10’ W x 12’ D x 9’ H)
   Depth: _______________
   Width: _______________

6. What is the size of your extraoral imaging room?
   Depth: _______________
   Width: _______________

7. Where are sensors and imaging accessories stored?
   - Sterilization area
   - Operatories
   - Other

8. Where do you want your intraoral X-ray mounted?
   - Wall
   - Cabinet
   - Mobile

9. Will there be monitors and CPUs in each operatory?
   - Yes
   - No

10. Do you plan to have any hygiene-specific rooms?
    - Yes
    - No

11. Will you require imaging capabilities in your treatment rooms?
    - Yes
    - No

12. What types of ancillary equipment do you use in your operatories?

13. Are there any other specialty carts or equipment your operatory needs to accommodate?

NEXT STEPS
Now, go back through the solutions we show on pages 6-15. Mark the features that appeal to you. What do you like about each one?
“We recently tested out a (ClearVision) dental sensor. We did not have any plans to purchase one but wanted to see what our choices were when we needed new sensors in the future. After about a week of using it, we did not want to give it back! We take multiple full mouth series every day. We used to have to use two sizes of sensors for every FMX. We can take any image we need on just the one (ClearVision) sensor due to its angled corners. My staff loves not having to change sensor sizes! The image quality speaks for itself. Our previous sensor had grainy images that were never easy to read. I took a bitewing series on the (ClearVision) sensor after getting an unclear image on the [competitor] sensor. There was no doubt about caries detection on the (ClearVision). I highly recommend you try one for a couple weeks if you want clearer images with fewer sensors that will be more comfortable to the patients.”

Michele M. Mills, DMD
Mills & Shannon Dentistry
Intraoral X-ray

The Preva is the imaging workhorse of the dental office, used to detect cavities or other problem areas. With exceptional image quality and proven mechanics, Preva units are a pleasure to operate with effortless movement and drift-free positioning. Preva offers a powerful combination of features designed to provide maximal flexibility, razor-sharp images and years of productivity. Midmark Preva intraoral X-ray systems use a high-frequency direct current (DC) method of image capture in a range of solutions for your practice needs.

Intraoral DC X-ray System adds superior technology to the most common X-ray unit used by dental practitioners, to:

- Identify cavities and visualize tooth roots
- Examine the status of developing teeth
- Monitor the overall health of the bony area surrounding the tooth

PREVA – FLAWLESS IMAGING AND ENHANCED WORKFLOW

01 The easy-to-use LCD control panel display with large icons helps to identify target tooth, receptor type and patient size while also offering pre-programmed technique settings.

02 The Preva system is designed for effortless movement and fast one-handed positioning.

03 Preva provides a 0.4 mm focal spot for sharp, well-defined details that allow easy identification of pathology with both film and digital sensors.

04 The proprietary dual-arm braking system helps the head stay exactly where you position it without sagging or drifting.
TAKE DIGITAL IMAGING TO THE NEXT LEVEL

01 The Preva Plus is configured with all the features of the Preva DC and 2.0, plus integration with our ClearVision digital sensor, and built-in storage to keep sensors from being damaged or misplaced.

02 Grow with the Preva 2.0 that gives you a high-speed USB connector so you can go digital when your practice is ready.

CHOOSE THE OPTION THAT WORKS FOR YOUR PRACTICE

All Preva models are available in multiple mounting configurations to best suit your operatory needs: mobile, cabinet or wall.
ClearVision is the digital sensor system from Midmark, designed to simplify practice integration and deliver high-quality images in a durable, patient-friendly design. Featuring a direct USB 2.0 connection, advanced CMOS technology optimizes resolution while reducing noise, producing sharp, detailed images for immediate review and diagnosis.

**PATIENT COMFORT**
ClearVision sensor’s thin profile, rounded corners, and contoured surfaces are designed to minimize patient discomfort commonly found with square or clipped edges. Available in two sizes to best accommodate patient needs.

**BETTER PRACTICE INTEGRATION**
In the digital age, integration is essential to all you do. ClearVision is designed specifically to make imaging easier and more efficient for your busy practice by integrating with our Preva 2.0 and Preva plus intraoral X-rays through a direct USB hub.

**IMAGE CLARITY**
Advanced CMOS technology optimizes resolution while reducing noise, producing sharp, detailed images for immediate review and diagnosis. ClearVision sensors are compatible with leading practice management systems.

**QUALITY AND DEPENDABILITY**
Our sensor housing and cable are designed for reliability, water-tight connection, and to allow for repeated immersion in disinfectants to promote asepsis. For added durability, Kevlar® strands are integrated to reinforce the cabling for a thin, flexible cable you can rely on.

**PEACE OF MIND**
All ClearVision sensors come with a standard two-year manufacturer’s warranty covering failure or malfunction due to normal uses and our exclusive Sensor Safe® extended care and priority replacement plan for years one through five. Contact Midmark Customer Experience for the Sensor Safe extended-care plan details.
With its small footprint and elegant design, the ClearVision CR Digital Reader easily fits into even the smallest dental offices and exam rooms. Familiar workflow, and accessories comparable to those for film, allow for seamless integration into your practice.

Progeny Imaging Software supports image acquisition, diagnosis and image handling. Magnification, contrast or density adjustment, and annotation are just a few of the powerful tools provided. Images can be exported, emailed or printed for insurers, your patients or referrals.

IMAGING CAPTURE MADE SIMPLE:
- Superb image quality
- Powerful, no-hassle software
- Intuitive and logical interface
- Simplified acquisition
- DICOM-formatted images
- Data backup and restore functions
- 22 practical and useful tools
- Create your own custom templates
- Bridges with most major practice management programs and stores any digital image

Improve clinical workflow by using patient records to easily associate X-ray images and other related files to the patient, all in one place.

Pregeny Clarity™ and Pregeny Clarity™ Plus reduce ghosting and overlapping of bony tissue, define edges, and enhance slight differences in tissue density for more accurate diagnoses.
Extraoral X-ray is an essential diagnostic tool for dentists, orthodontists and oral surgeons:

- TMJ diagnosis and treatment planning
- Diagnosis of impacted wisdom teeth and treatment planning
- Screening for the placement of dental implants
- Orthodontic assessment
- Diagnosis of developmental anomalies
- Assessment of periodontal bone loss
- Visualization of periapical involvement
- General cancer screening of the jaw
- Full mouth view to identify sources of dental pain

Extraoral Digital Panoramic X-ray System

EXPLORE EFFORTLESS WORKFLOW AND EASE OF USE WITH THE PROGENY VANTAGE 2D PANORAMIC SYSTEM

Extraoral X-rays let you keep track of growth and development, examine the bones of the face and relationship between teeth and jaws, and show the status of impacted teeth. Experience the ease of use and improved patient comfort with the Progeny Vantage Digital Panoramic System, designed to improve the way you work. With an integrated Microsoft Windows®-based computer, Vantage lets you set up exams and deliver diagnostic images chairside, giving you more time with the patient for positioning and image review. The Progeny Vantage Panoramic System delivers the features necessary to support efficient imaging workflow in your practice and improve patient care.
THE VANTAGE PANORAMIC SYSTEM PROVIDES EASY OPERATION, IMAGE CLARITY AND ENHANCED WORKFLOW FOR A FAST AND ACCURATE DIAGNOSIS.

01 EASY TO USE
Five pre-programmed exam settings, including pediatric, bitewing and TMJ, minimize exam set-up time and allow routine diagnostic exams to be performed.

The easy-to-use, tablet-like Vantage Touch® operator panel provides exam selections, technique factors and a sample exam image with a simple touch or swipe.

The image is immediately captured on the Vantage Touch display for a quick assessment before releasing the patient.

02 IMPROVED WORKFLOW
Open, compact design optimizes space requirements, allows for face to face patient positioning and is cephal upgradeable for expanded exam capabilities.

Industry-standard TWAIN digital imaging interface ensures compatibility with many practice management software systems, for seamless digital connectivity and maximum efficiency.

03 BUILT IN POSITION TOOLS AND TRAINING
Alignment tools are easy to use, facilitating patient positioning for a quality panoramic image.

Vantage comes with control buttons for column height, a patient positioning table with chin rest, bite guide, and positioning wands. Plus a laser positioning system with Frankfort plane laser, mid-Sagittal laser, and Cuspid laser to accurately indicate the correct alignment points.

Positioning training for staff is offered for the first 60 days at no charge through the exclusive Vantage Trust remote support and training service. For convenience, videos can be easily accessed right from the Vantage Touch operator panel. See pages 32-33 for more information.

04 IMAGE CLARITY
3-Motion Technology For Superior Image Quality
With multi-dimensional arm movements, 3-motion technology provides the proper imaging geometry needed to capture undistorted panoramic images and diagnostic bitewing X-rays with open contacts. This provides access to more exam types and superior image quality over other X-ray models for better diagnostics and an enhanced patient experience.

Progeny Clarity Enhanced filter set and automatic spinal compensation provide superior diagnostic imaging quality for accurate diagnosis.
Cephalometric System

EXCEPTIONAL IMAGING, EXCEPTIONAL FEATURES

A cephalometric system allows viewing teeth in relation to the jaw and the patient’s profile for the ideal orthodontic planning and treatment. The Progeny Vantage C can be fitted with two dedicated sensors—one panoramic, one cephalometric—for optimal examination efficiency. Or select one sensor to use for both functions, knowing you can add a second sensor in the future. Enhanced by the exclusive Clarity Enhanced Imaging Filter Set, Vantage C provides the soft tissue visualization for the detailed patient profiles you need to identify the bony and soft tissue landmarks. These critical points of reference are essential for accurate measurement in orthodontic patient treatment care planning.

FEATURES

01 Easy-to-use cephalostat can be installed either left or right
02 Cephalostat, ear posts and nasion positioner ensure accurate positioning
03 Includes Vantage Trust remote training and positioning assistance
04 Vantage Touch interactive operator panel is easy to use
05 Award-winning open design improves patient comfort
06 Slit-scan collimation reduces scatter radiation, improving image visualization

Panoramic Positioning Support

Vantage Trust offers exclusive remote support and positioning training for panoramic system users, available only for the Progeny Vantage Digital Panoramic System.

Pre-installed software and automatic forwarding of images to Vantage Trust for feedback make it easy to use, with summary data, images and patient positioning reports readily available at progenyvantagetrust.com. Help your staff make the most of your panoramic imaging investment, while providing them with responsive training and feedback they can really use.

VANTAGE TRUST TOP 5 POSITIONING ERRORS AND CORRECTIONS

- **ERROR:** Chin tilted up
  - **CORRECTION:** Adjust the tilt of the patient’s head

- **ERROR:** Air passage is open
  - **CORRECTION:** Swallow, place tongue to the roof of the mouth, and hold breath

- **ERROR:** Too far forward
  - **CORRECTION:** Place the upper and lower anterior teeth firmly between the ridges of the bite guide

- **ERROR:** Too far back
  - **CORRECTION:** Place the upper and lower anterior teeth firmly between the ridges of the bite guide

- **ERROR:** Tilted to the left
  - **CORRECTION:** Proper placement is derived by bringing the nasal bridge to the marker and continuing down to align the middle of the central incisors

These figures and examples are derived from analysis of 2,914 customer reports created by the Vantage Trust service from 2011 to 2017.

CLEARVISION SENSORS
XSDS-01 ClearVision Digital Sensor System, Size 1 sensor
XSDS-02 ClearVision Digital Sensor System, Size 2 sensor
XSDS-08 ClearVision Digital Sensor System, Size 1 and Size 2 sensors

System Includes: ClearVision Digital Sensor with 3 meter (9.84’) cable, USB drive with Progeny Imaging Software, sensor calibration file and documentation kit with user manual, sample sheath pack and Rinn XCP-DS Fit positioning guide holder

CLEARVISION LAPTOP SUITE
A seamless method for converting a practice to digital radiography, the ClearVision Laptop Suite includes the ClearVision Digital Sensor system along with a laptop preconfigured for your Progeny ClearVision Sensor. The laptop is preloaded with Progeny Imaging Software, Progeny Device Suite including a TWAIN client and the paired ClearVision sensor calibration files.
XSDS-01/L Progeny ClearVision Digital Sensor System with Laptop, Size 1 sensor
XSDS-02/L Progeny ClearVision Digital Sensor System with Laptop, Size 2 sensor
XSDS-0B/L Progeny ClearVision Digital Sensor System with Laptop, Size 1 and Size 2 sensors

CLEARVISION SENSOR ACCESSORIES
500-432 Sensor Sheaths for Size 1 Sensor (500/box)
500-433 Sensor Sheaths for Size 2 Sensor (500/box)
45-M3001 Sensor Holder, Desktop
45-P0002 Sensor Holder, Arm
Rinn XCP-DS Fit positioning guide holder

CLEARVISION CR DIGITAL DENTAL RADIOGRAPHY READER
The ClearVision CR System includes the ClearVision CR Reader, 2 each Size 0 imaging plates, 4 each Size 2 imaging plates, imaging plate storage box, hygienic bags Size 0 (Box of 100), hygienic bags Size 2 (Box of 100), USB 2.0 interface cable, power cable and Progeny Imaging Software.
XPDZ-02 ClearVision CR System
CR-PP-13-001 Imaging Plate Storage Box

ENRICHING THE POINT-OF-CARE EXPERIENCE

When you choose Midmark, you get so much more than a product. You get a partner with decades of hands-on manufacturing expertise, inspired design innovation, and landmark thought leadership in workflow efficiency. Midmark continues its long tradition of improving patient care by infusing function-forward design, relentless quality and thoughtful technology into every product. And with an extensive warranty and dedicated technical support, we’re right by your side the moment you need us.

WARRANTY AND SERVICE

We stand by the quality and reliability of our products. That is why we offer a standard three-year limited warranty on the Vantage Panoramic and a two-year limited warranty for all other imaging products purchased through an authorized Midmark dealer. ClearVision sensors come with an extended care plan and replacement priority shipping for five years for failure or malfunction. In addition to warranty, Midmark has dedicated Imaging Specialists to offer support in intraoral and extraoral imaging products and trends. Working in conjunction with Midmark Customer Experience and Technical Service teams, you can be assured you have the full support you need for product questions, from installation to maintenance and service.

IMAGING EXPERTISE

We stand behind every Midmark product we sell, ready to support you with a team of experts in imaging technology. Our highly trained Imaging Specialists and U.S.-based customer service and support are reknowned among end-users and dealers alike, giving you the confidence you need to equip your practice for success with no second thoughts. When you buy Midmark, you get more than products; you get a partner.
