

Synthesis® Cabinetry Collection

DURABILITY FOR A MODERN PRACTICE

Midmark Synthesis Cabinetry Collection has long been known for exceptional strength and durability. With its unique steel structure and asepsis-friendly design, it's an investment you can feel good about.

STYLING OPTIONS

Innovative design for the dental space, complete with modern panel and handle options—Synthesis Casework Collection, a blend of functionality with sophistication.

Panels: Serenity, Transcend, Pinnacle, Renew and Cove

Handles: Arc, Edge, Flare, Bent and Bent Antimicrobial

- 01 Built to last** - Built to deliver a beautiful “like new” appearance over its lifetime, so you can take pride in your office design. Behind the wood cabinet appearance is a strong steel frame coated with electrostatic powder-coat paint. The outside structure is covered with a durable vinyl finish, providing scratch- and stain-resistant surfaces that local millwork can’t duplicate.
- 02 Enduring quality and strength** - A cabinet is only as good as the components that support it. The steel frame provides a strong mounting foundation for full extension drawer glides and door hinges – a foundation that maintains its integrity over years of use.
- 03 Asepsis-friendly design** - Synthesis cabinetry is specifically designed to withstand the demands of the dental healthcare environment. Seamless, vinyl-covered panels resist spilled fluids and chemicals, and can be cleaned without surface degradation. Seamless, polystyrene drawers contain spills and are easy to clean.

SYNTHESIS CABINETRY COLLECTION
