

641 Oral Procedure Chair

Note: Chair shown with optional arm rests

PERFORM PROCEDURES MORE COMFORTABLY AND EFFICIENTLY WITH VERSATILE POSITIONING AND INCREASED ACCESSIBILITY.

The 641 Oral Procedure Chair is designed to help you better position patients while maintaining an ergonomically correct posture throughout procedures. Clear chair access and a large range of motion facilitate optimum positioning that can help patients remain calm and relaxed. Hand and foot controls with the auto-return option allow simple, efficient patient entry and exit. The adjustable headrest and variety of patient support accessories not only increase comfort for your patients, but also assist in ideal head and neck positioning.

01

02

03

- 01** The Elevated Flat position is designed to improve access and visibility to the patient's head, neck and torso.
- 02** The Semi-Fowler position is designed to improve patient comfort and provide better ergonomics for the dental clinician.
- 03** Choose from multiple headrest styles. An adjustable headrest can accommodate taller patients with an expanded range of patient positioning.
