

Spark your imagination with the rich colors and beautiful styling options of Midmark® Artizan Expressions Cabinetry.

### CABINET FINISHES

Available in a variety of Arauco® and Formica® colors, Artizan Expressions Cabinetry uses thermally fused melamine panels. These panels are created using high heat and pressure to form a durable, peel-resistant finish. Matching 3-mm edgebanding completely seals panel corners against moisture—an ideal design for infection prevention.

### RESIN PANELS

Lumicor® EcoShield panels are made of Lumiform, a PETG resin that is 40 times stronger than glass, impact resistant and made with at least 40% recycled content. This resin fully encapsulates hand-laid botanicals, organic elements, woven textiles and graphics—creating an artful expression for your treatment station upper cabinet.

### UPHOLSTERY

Ultraleather® delivers beautiful, soft, luxurious surfaces with exceptional durability. Free from volatile organic compounds (VOC), persistent organic pollutants (POP), and formaldehyde, Ultraleather is also an environmentally conscious choice.

### QUARTZ COUNTERTOPS

Composed of 93% pure quartz crystal, quartz countertops feature a natural depth and radiance free of the imperfections common in raw stone. As one of nature's strongest materials, quartz is exceptionally durable and scratch resistant. Its smooth, non-porous surface resists even the toughest stains and retains its luster for years without requiring sealants or waxes.

### SOLID SURFACE COUNTERTOPS

Solid surface is a durable, versatile material ideal for dental environments. Made from an advanced blend of natural minerals and acrylic polymer, this non-porous surface resists stains and does not support microbial growth when properly cleaned. Its superior durability helps it withstand the impacts, nicks and cuts that blemish most other surfaces—and minor scratches can be buffed away to keep the surface looking and performing like new for years.
