

THE REAL ERGONOMIC RISK

It's **not one** big strain.
It's **thousands** of small movements.

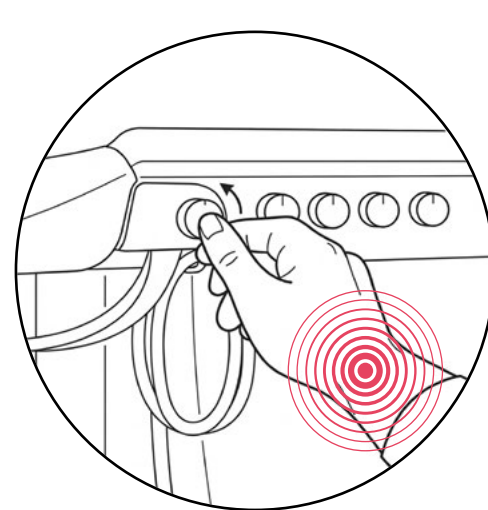

The movements you **barely notice** may be the ones that **matter most**.

One Extra Reach

One Extra Twist

One Extra Adjustment

Just **one** extra micro-movement, repeated across **18** patients per day, can add up to:

4,000+

extra movements per year*

100,000+

extra movements over a career*

The hidden issue: Cumulative Micro-Strain

The solution: Human-Centered Design

Midmark Operatory Solutions use human-centered design to help keep instruments, controls and the oral cavity within ergonomic reach, supporting your musculoskeletal health whether seated or standing.

Better positioning. Better access. Better posture.

Support smooth sit-to-stand dentistry with next-generation Midmark Operatory Solutions, featuring the **only height-adjustable, column-mounted 12 o'clock delivery system** for doctors and assistants and the **only chair with 19 inches of vertical travel and less than 6 inches of horizontal movement**.

Reduce strain. Protect careers.

CHOOSE MIDMARK ▶

*Illustrative example based on one extra movement per patient, over 18 patients per day, 5 days per week, 46 weeks per year and a 25-year career.
