DENTAL

Operatory Cabinetry

Designing Better Care

We believe design is about not just the space, but the purpose of the space. Specialized care requires specialized solutions. Choose cabinetry designed for dentistry.

Choose Cabinetry Designed for Dentistry

Midmark offers two collections of clinical-grade cabinetry—Synthesis® and Artizan® Expressions—specifically designed for the rigors of the healthcare environment and crafted to fit your space, style and workflow.

Better Insight for Better Care

Know how your equipment is performing so you can focus on the people who matter most.

Midmark Smart View™ is a cloud-based service* designed to maximize the value of Midmark products by providing

- real-time performance insights,
- proactive maintenance tracking,
- cycle records and reporting,
- and software updates

through the myMidmark portal.

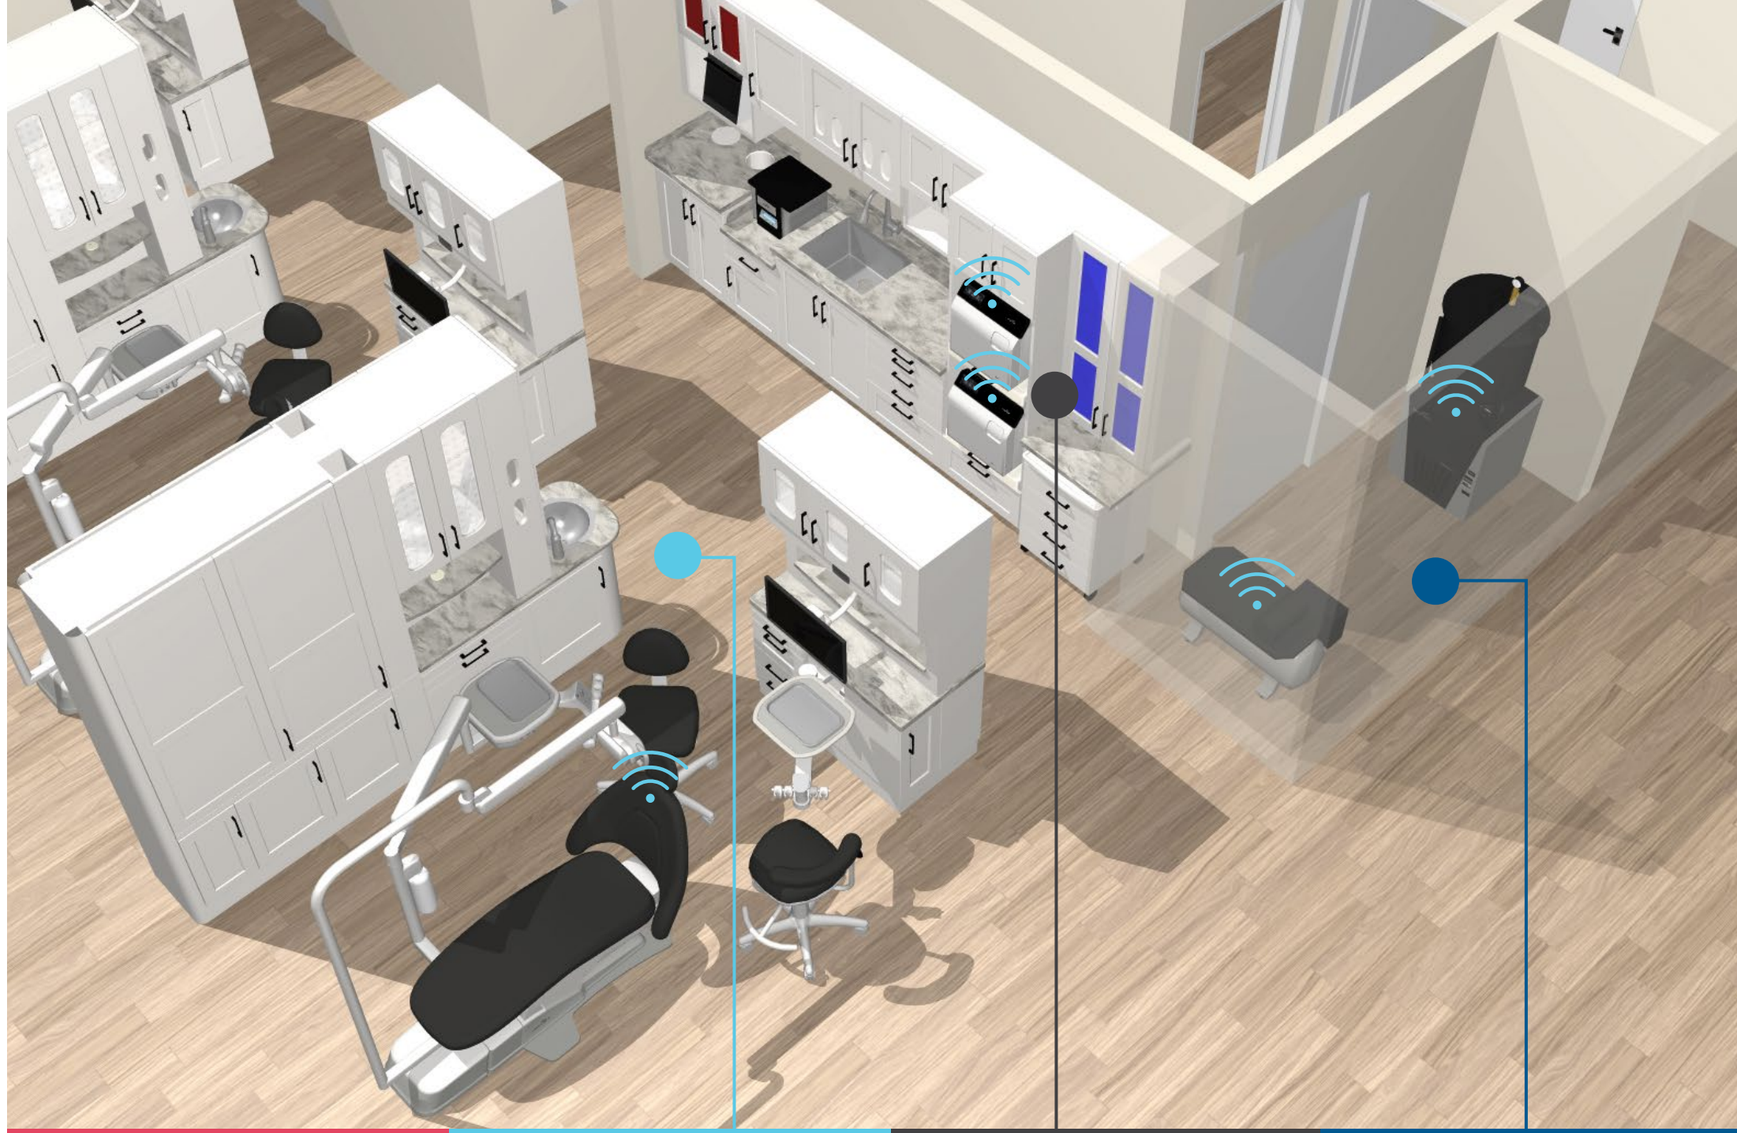
With continuous enhancements and feature upgrades, Smart View can help eliminate the risks of outdated technology, while enhancing performance to support long-term efficiency and compliance.

** Some features may require an active Smart View plan*

EXPERIENCE THE NEW MIDMARK DENTAL

With new connected technology and enhanced operatory, instrument processing and mechanical room solutions, the new Midmark Dental is helping set a new standard and advance what's possible in dental care. **Discover how we can design better care together.**

SCAN OR CLICK TO LEARN HOW TO CONNECT



SEE THE WHOLE PICTURE

Access usage trends, compliance data and equipment status for your connected Midmark solutions from one secure dashboard, whether you manage one location or many.

ENHANCE PERFORMANCE

Connect your dental chairs, delivery systems and LED lights for ongoing software updates designed to enhance equipment performance and workflow.

STREAMLINE EQUIPMENT MANAGEMENT

Manage connected sterilizers across your organization to help improve workflow efficiency, simplify compliance and protect the lifespan of your equipment.

KEEP CARE MOVING

Receive routine maintenance notifications and critical alerts for your connected air compressors and dry vacuums to help minimize downtime and keep care moving.

Optimize Workflows

DESIGNED TO STREAMLINE YOUR PRACTICE

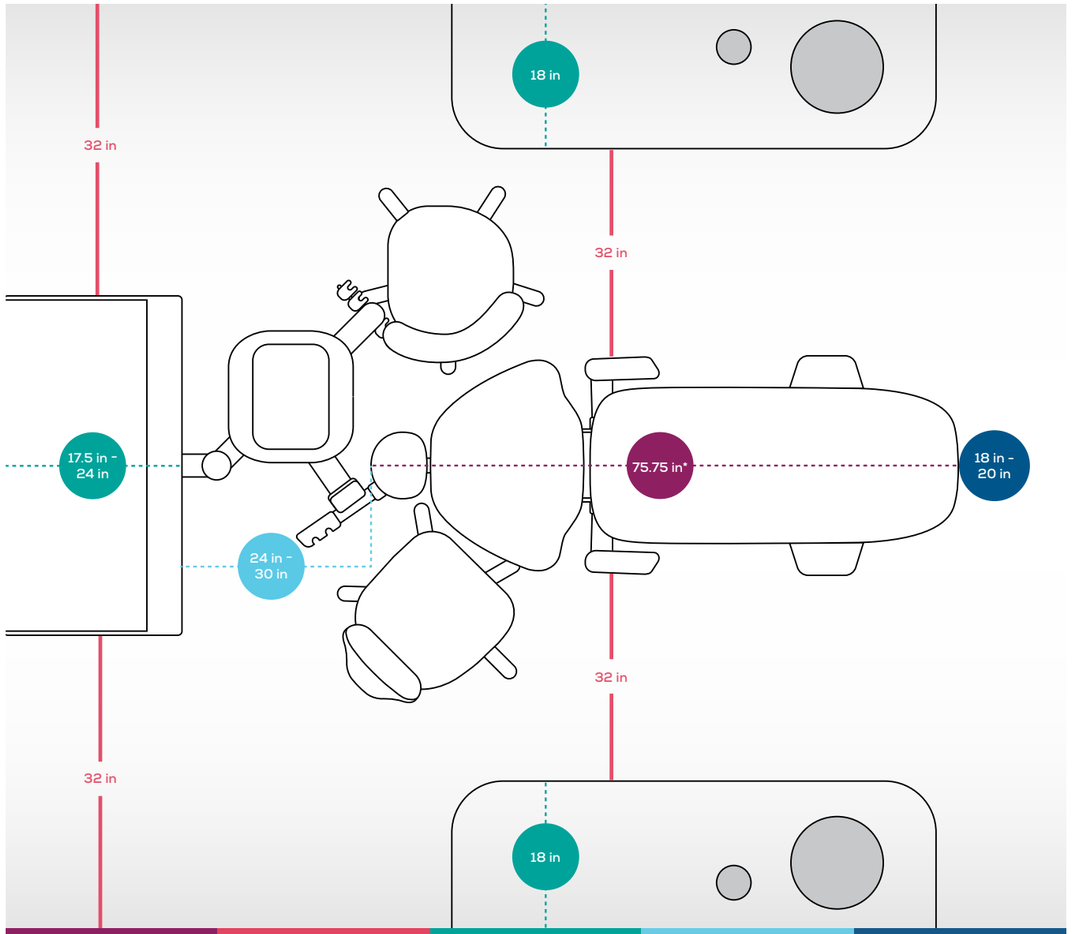
To support optimal workflow and ergonomic efficiency, clinical design best practices recommend allocating approximately 120 square feet per operatory—measuring 10 feet, 4 inches wide by 12 feet deep.

These dimensions support efficient cabinetry and equipment placement, provide maneuvering space around the chair and ensure ADA clearance compliance. They also help keep worksurfaces, instruments and the patient's oral cavity within easy reach during procedures.

In contrast, smaller operatories can compromise efficiency by limiting worksurfaces, reducing storage capacity and positioning essential components out of reach—ultimately disrupting your clinical workflow.

PLAN FOR EFFICIENCY

Start with the dental chair as your anchor, then layer in essential clearances, worksurfaces and equipment. This dual-entry design supports ergonomic access, streamlined workflows and optimal use of space.



Start with the dental chair, typically 75.75"* long, as the center of your operatory.

Keep 32" of space in at least one doorway per ADA recommendations and 32" of space between the chair and side cabinet on at least one side of the dental chair for entry and exit.

Add side cabinets, typically 18" deep, and a treatment station, between 17.5" to 24" deep, for adequate storage and instruments within reach.

Add 24" to 30" between the treatment station and fully reclined head of the chair, depending on the unit configuration, to work comfortably from the 10 o'clock to 2 o'clock positions.

Add 18" at the toe of the chair for 12 o'clock delivery and 20" for left/right delivery to maintain clearance for staff, equipment and horizontal travel when raising the chair.

**Adjustable backrest: 77 in*

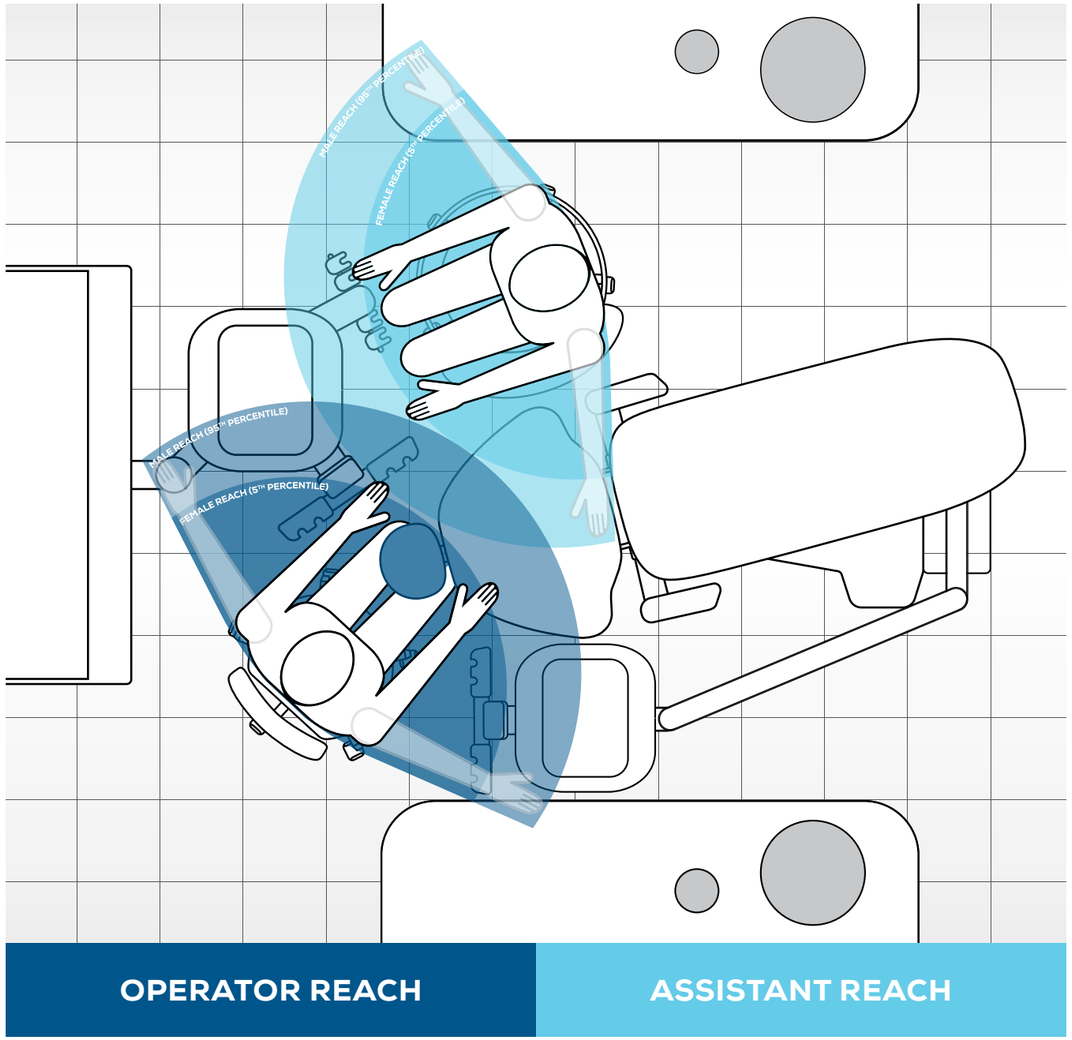
Support
Musculoskeletal Health

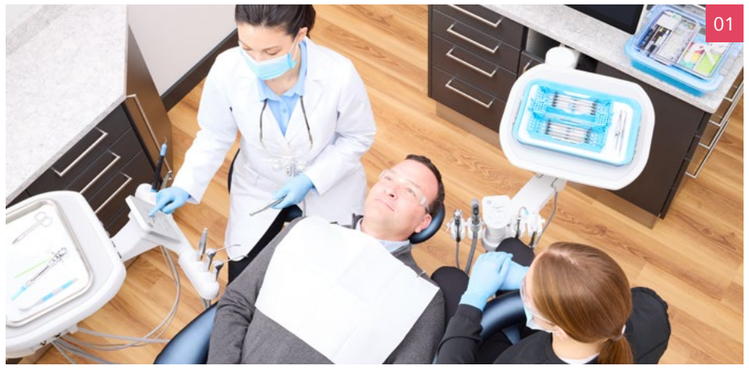
DESIGNED FOR BETTER ERGONOMICS

Reducing musculoskeletal pain and disorders starts with equipment and environments designed to work with the body, not against it. For better ergonomics, choose cabinetry that helps position supplies, work surfaces and technology where your team needs them most.

Side cabinets and treatment stations can help create convenient work zones near the point of care, while wall-hung cabinets with lower upper-cabinet heights and shallower depths can improve access to stored supplies. Optional angled shelving and organized bins help keep items visible and easier to retrieve.

Midmark clinical-grade cabinetry offers these design choices to help reduce unnecessary reaching, leaning, twisting and wasted motion, supporting a more ergonomic workflow.





01 A Midmark left/right doctor's delivery unit and rear chair-hub-mounted assistant's unit combine with a mobile cabinet and pivoting worksurface on the treatment station to help improve ergonomic reach and workflow.

Choose Clinical-Grade Cabinetry for Your Dental Practice

Midmark Synthesis® and Artizan® Expressions cabinetry collections are engineered specifically for the unique demands of dentistry, bringing together clinical performance, design flexibility and long-term reliability.

Durable materials and construction help resist the moisture, stringent cleaning and heavy use common in dental operatories, while asepsis-friendly surfaces support cleanability and infection prevention. With flexible configurations, colors and finishes, Midmark cabinetry can be tailored to support your workflow, reflect your brand and help create a comfortable, welcoming patient experience.

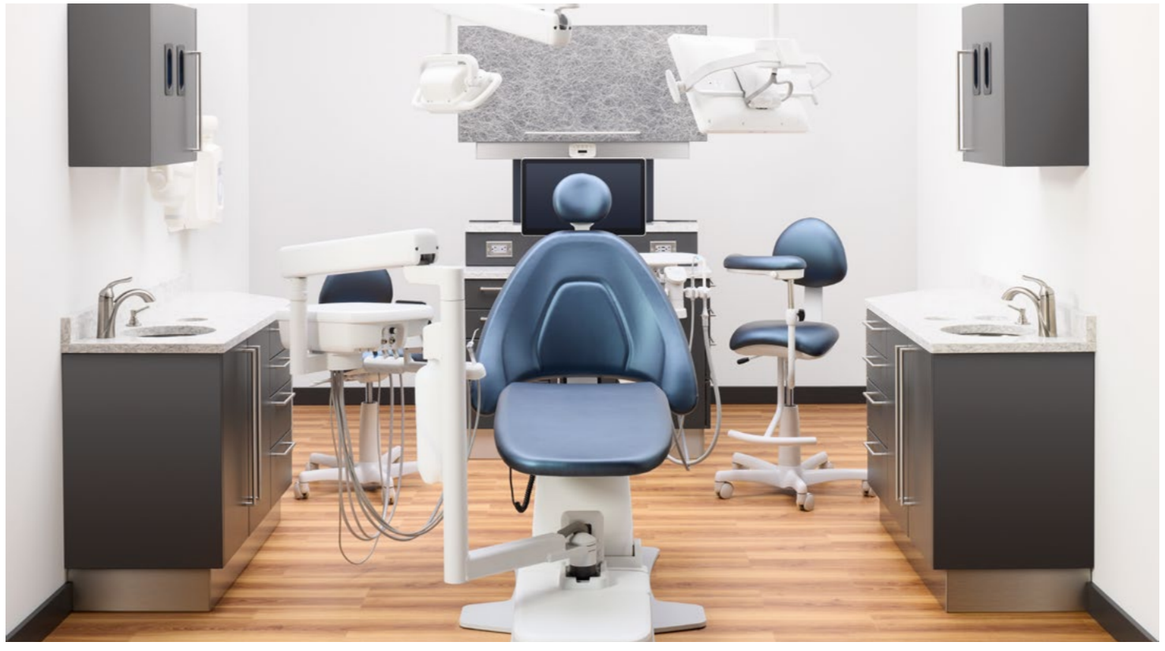
SYNTHESIS® CABINETRY



ARTIZAN® EXPRESSIONS CABINETRY

Compare Quality

MIDMARK® CLINICAL-GRADE CABINETRY VS. CONSUMER-GRADE CABINETRY

Most generic or local cabinetry is not designed for the demanding dental environment. Consumer-grade cabinetry can delaminate over time, develop unsealed corners susceptible to bacteria and moisture, and warp from the humidity inherent in a dental practice.

	CABINET FRAME	PANEL SUBSTRATES	BASE MATERIAL	FINISHES	TYPES OF ASSEMBLY	DRAWERS	DRAWER SLIDES	HANDLES
MIDMARK SYNTHESIS® CABINETRY **A steel foundation provides strength and durability.**	 • 18-gauge cold-rolled steel • Modular design	 • LEED® compliant, Medium-density fiberboard • 0.75 in panels	 • Thermofoil over electrostatic, powder-coat painted steel (woodgrain and metallic colors) • Electrostatic, powder-coat painted steel (solid colors) • Integrated adjustable levelers	 • PVC thermofoil (woodgrain and metallic colors) • PVC thermofoil and electrostatic, powder-coat paint (solid colors)	 • Mechanical fasteners (screws, pop rivets) • Tog-L-Loc® sheet metal joining system *Mechanical fasteners and Tog-L-Loc provide reliable strength.*	 • Seamless, one-piece polystyrene *Seamless polystyrene drawers with rounded corners contain spills and simplify cleaning.*	 • Full-extension ball bearing drawer system • Steel mounting foundation • Soft-close feature	 • Integrated and insert options • Brushed nickel options • Antimicrobial option *Synthesis pull options support an aseptic environment.*
MIDMARK ARTIZAN® EXPRESSIONS CABINETRY **Industrial-grade strength prolongs durability.**	 • 0.75 in industrial-grade particle board • Customizable design that can be configured to specific requirements	 • Industrial-grade particle board • 0.75 in panels	 • Seamless stainless steel • Integrated adjustable levelers	 • Factory pre-applied, thermally fused melamine • 1.2 mm PVC edgebanding	 • 100% glue-dowel assembly *Glue-dowel assembly adds strength to the frame.*	 • Wood bottom and backs using factory, pre-applied thermally fused melamine • Metal slides with front panel adjustment and removal feature	 • Full-extension ball bearing drawer system • Soft-close feature	 • Brushed nickel *Brushed nickel pulls are easy to clean for better asepsis.*
CONSUMER-GRADE CABINETRY* **Millwork options are not specifically designed to endure the clinical dental environment.**	 • 0.5 in to 0.625 in low-density particle board or plywood (typically) • Basic or limited design	 • Low-density particle board • Plywood	 • Basic plywood or particle board covered with laminate • Wood shims for leveling	 • High-pressure laminate – Not always properly applied – May use low-grade substrate material • Less than 2 mm edgebanding • Varnish, paint, or left unfinished	 • Staple fasteners (frequently) *The staple fasteners typically used in consumer-grade millwork are unreliable for clinical-grade cabinetry.*	 • Insides often varnished, painted or unfinished *Seams and sharp inner corners can result in difficulty cleaning and a build-up of contaminants.*	 • Single, undermounted runner (monorail glide—typically used) • Slides common in kitchens (less durable)	 • C-style shape • Plastic or aluminum *Consumer-grade millwork pulls are not made to support an aseptic clinical environment.*

NOTE: Fabrication of local cabinets may vary. However, materials depicted are typical in consumer-grade cabinetry.

Things to Consider

ERGONOMIC WORKFLOW

Is your storage designed for the clinicians who use it most?

Women represent about 96%[1] of dental hygienists and more than half of recent dental school graduates,[2] yet many cabinets place supplies out of comfortable reach. Overly tall or deep storage can make routine tasks harder on the body.

Consider wall-hung cabinetry designed to improve reach and visibility. **Midmark Artizan® Expressions and Synthesis® wall-hung cabinets** feature a lower upper-cabinet height and thinner depth to help reduce stretching and leaning.

DESIGN FLEXIBILITY

Does your cabinetry need to fit a unique room size, configuration or workflow?

Standard cabinetry layouts may not support the way every practice works. When space, processes or design goals vary, flexibility becomes essential.

Consider clinical-grade cabinetry with customizable options. **Midmark Artizan Expressions Cabinetry** offers layouts, configurations and finishes that can be tailored to your workflow, brand and overall practice design.

ROOM SIZE + LAYOUT

Does your layout support efficient movement and ADA clearances?

The right cabinetry plan can help reduce wasted motion, improve efficiency and support equipment integration, ergonomic movement and ADA considerations. But every design decision can affect how the room functions.

Consider guidance from an experienced dental practice designer. **Midmark Design Experts** can help create beautiful, functional operatories that support workflow and enhance patient comfort.

ASEPSIS + DURABILITY

Is your cabinetry designed for the demands of the dental environment?

Moisture, stringent cleaning, equipment integration and daily use can take a toll on cabinetry. In clinical settings, consumer-grade materials may be more prone to warping, delamination and bacterial growth.

Consider clinical-grade steel cabinetry. **Midmark Synthesis Cabinetry** combines steel-on-steel construction, nonporous seamless surfaces, modular flexibility and asepsis-friendly design options for better cleanability and long-term performance.

MOBILE TECHNOLOGY

Do you share technology, supplies or accessories between operatories?

When tools need to move from room to room, the right mobile solution can help reduce setup time and keep essential items close to the point of care.

Consider sturdy carts and mobile workstations. **Midmark mobile cabinets and workstations** help you transport technology and supplies where they are needed, supporting flexible room use and efficient workflows.

THE PATIENT EXPERIENCE

Have you considered how cabinetry finishes can affect the patient experience?

Research suggests color, texture and tone can impact patient mood and shape perceptions of the overall healthcare experience.[3] With careful selection, these design options may help reduce stress, enhance comfort and improve patient satisfaction.

Consider cabinetry with colors and finishes selected to support a calm, comfortable environment. Midmark Synthesis and Artizan Expressions cabinetry collections offer soft, cool tones, balanced neutrals and natural wood finishes to help shape operatories that feel welcoming, soothing and beautifully composed.

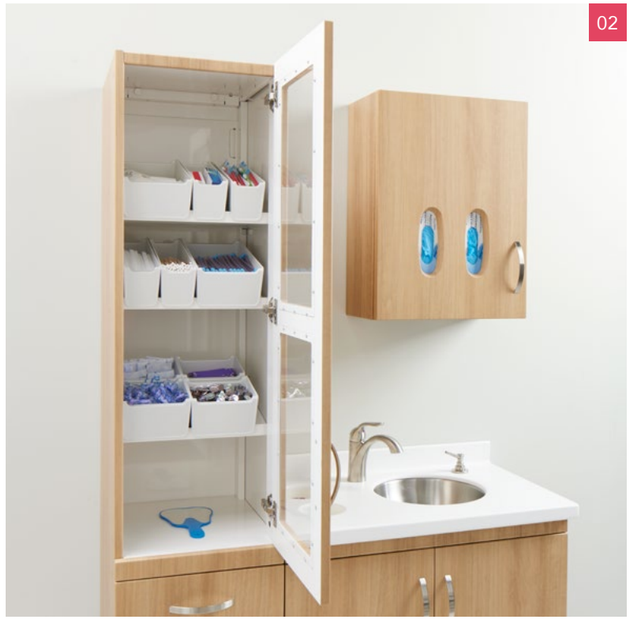
Midmark® Products + Solutions

SCAN OR CLICK TO VIEW PRODUCTS

Midmark®
Synthesis® Cabinetry

DESIGNED FOR DECADES OF CLINICAL PERFORMANCE

Steel-on-steel construction, seamless surfaces and modular configurations help Synthesis cabinetry deliver lasting durability, cleanability and flexibility that supports efficient dental workflows and long-term performance. Synthesis cabinetry can also contribute to earning credits in the LEED® Green Building Rating System.



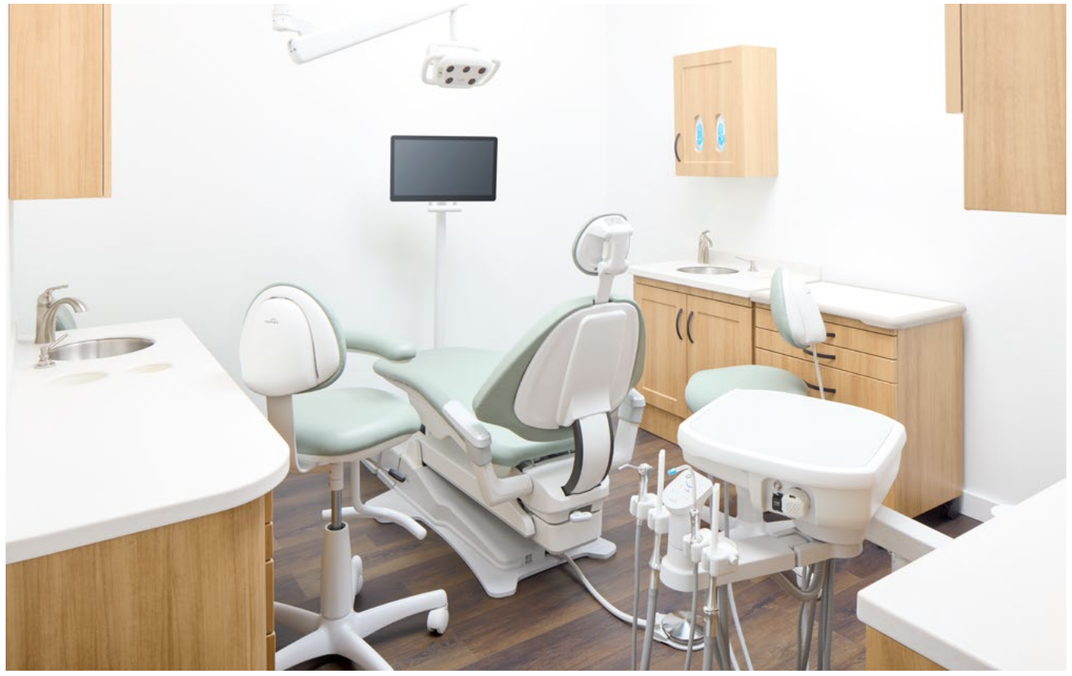
01 BINS + DIVIDERS
Bins and dividers help improve organization so you can easily find the supplies you need.

02 FLOW SHELVING
Gravity-fed, angled flow-shelving improves visibility and access to supplies, even for items stored at the back of the cabinet.

03 THERMOFOIL PANELS
Seamless thermofoil panels are designed to resist spills, chemical degradation and delamination, unlike common consumer-grade products.

Supporting a Healthier Environment

SYNTHESIS® CABINETRY



The unique product attributes of Midmark Synthesis cabinetry have been designed to assist you in obtaining credits within the LEED® family of rating systems. We choose to be proactive because we know that LEED contributes to healthy environments through improved air quality, and we want to be your partner in the facilitation of a safer working environment.

DESIGN A HEALTHY ENVIRONMENT TOGETHER

Midmark Synthesis cabinetry can contribute to specific strategies and LEED credits that can impact building certification including water efficiency, construction waste management, material reuse, recycled content, local/regional materials and low-emitting materials. See the table for a comprehensive list of credits.

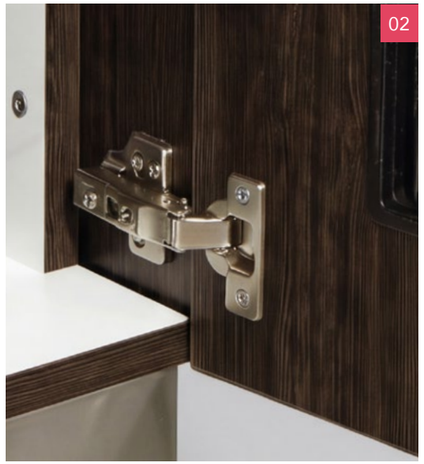
LEED® v5 Credit Mapping

Credit	Contribution	Possible Points
MRc1 Interior Materials Reuse	**ID+C: Commercial Interior** Modular, reconfigurable cabinetry supports on-site reuse within the same project, supporting adaptable healthcare environments and reducing the need for new materials.	1-4
MRc1 Interior Materials Reuse	**ID+C: Commercial Interior** Modular, reconfigurable cabinetry supports off-site reuse in new project locations, supporting material circularity by integrating salvaged cabinetry into evolving clinical environments, extending product life and reducing demolition waste and new manufacturing demand.	1-3
MRc3 Low-Emitting Materials	**BD+C: New Build + ID+C: Commercial Interiors** Low-emitting cabinetry components support healthier, human-centered clinical environments by reducing VOC exposure and improving indoor air quality for patients, clinicians and staff.	1-4
MRc4 Building Product Selection and Procurement	**BD+C: New Build + ID+C: Commercial Interiors** Select cabinetry components enable informed, sustainability-driven material selection through transparent life cycle impact data, supporting project-level environmental performance goals.	1-5
MRc5 Waste Diversion	**BD+C: New Build + ID+C: Commercial Interiors** Recyclable cabinetry packaging supports waste diversion by facilitating efficient sorting and reducing construction waste sent to a landfill.	1-3
WEc2 Water Efficiency	**BD+C: New Build + ID+C: Commercial Interiors** Integrated sensor-operated, low-flow fixtures enhance water efficiency by reducing potable water use and supporting project-level water reduction strategies.	1-6
EQc3 Accessibility + Inclusion	**BD+C: New Build + ID+C: Commercial Interiors** Cabinetry and sink configurations support inclusive, human-centered clinical environments by enhancing usability, accessibility and workflow efficiency for diverse patient populations and clinical staff, fostering comfort, dignity and a sense of belonging beyond minimum code requirements.	1-2

Midmark® Artizan® Expressions Cabinetry

DESIGNED FOR STYLE, STRENGTH + FLEXIBILITY

Blending modern aesthetics with clinical functionality, Artizan Expressions cabinetry helps create an organized, inviting operatory that supports patient comfort and efficient care delivery. Customizable configurations and finishes help tailor the space to your workflow, brand and design vision.



01 LIFT-UP DOORS
Lift-up doors provide greater clearance in tight spaces and improve visibility to all upper contents when open.

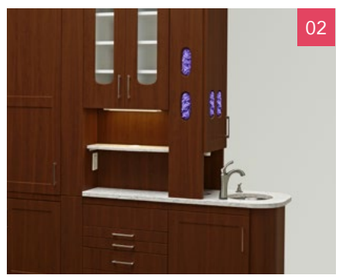
02 SOFT-CLOSE HINGES
Concealed Blum® soft-close steel hinges adjust easily, open 110° and prevent damaging door slamming.

03 MOISTURE RESISTANCE
Non-corroding brushed nickel handles and 1.2 mm PVC edgebanding, which seals panel edges and corners from moisture, support durability and asepsis.

Central Stations

SYNTHESIS® CABINETRY

01 PASSTHROUGH CABINET
Make efficient use of your space with flexible passthrough options for your intraoral X-ray solutions.

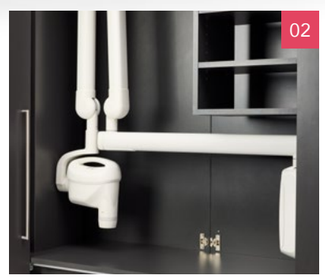


02 DUAL-SIDE STORAGE
Save valuable floor space with Synthesis Central Stations ideal for multi-room plans, providing storage on both sides for the dentist and assistant.

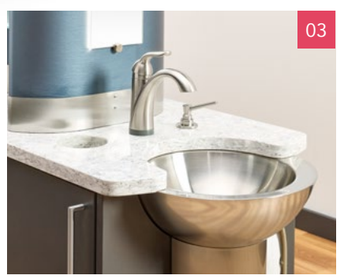
03 FULL-EXTENSION DRAWERS
Improve durability with full-extension ball-bearing drawer slides and slide attachments designed for better withdrawal strength.

ARTIZAN® EXPRESSIONS CABINETRY

01 CONCEALED STORAGE
Bring a modern look to the operatory by keeping clinical supplies tucked out of view of patients yet easily accessible by the dental team.



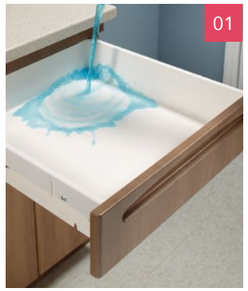
02 PASSTHROUGH CABINET
Share one intraoral X-ray between two operatory entries with an Artizan Central Station.



03 SHARED SINK
Optimize space with one sink shared between two operatories and add sophistication with sleek upholstered panels.

Treatment Stations + Side Cabinets

SYNTHESIS® CABINETRY

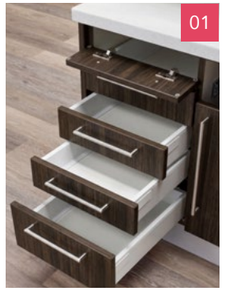


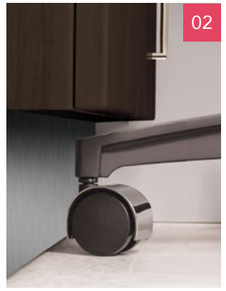
01 SEAMLESS DRAWER INTERIORS
Seamless, one-piece polystyrene drawers with rounded corners contain spills and simplify cleaning.

02 STRONG DRAWERS
Synthesis drawers are engineered for enhanced strength and durability.

03 SLIDE-OUT STORAGE
Slide-out storage can be prepped with commonly needed equipment, keeping clinicians in the operatory and making your equipment easily accessible during procedures.

ARTIZAN® EXPRESSIONS CABINETRY





01 FULL-EXTENSION DRAWERS
Full-extension soft-close drawers can withstand the demands of the dental practice and help promote a calmer environment by preventing slamming drawers.

02 TOE KICK
A 4.25 in tall toe kick allows clinician seating to roll underneath cabinet doors and drawers while preventing damage to the cabinetry.

03 CUSTOMIZABLE OPTIONS
Create your own style with customizable options like Ultraleather® upholstered panels for your treatment station.

Wall-Hung Cabinets

SYNTHESIS® CABINETRY

Designed around the clinicians who use cabinetry most, Synthesis wall-hung cabinets help bring supplies into clearer view and easier reach. With women representing 96% of dental hygienists[1] and more than half of recent dental school graduates[2], Synthesis supports the needs of today's dental teams with a lower upper-cabinet height and shallower depth. Angled flow shelving and stackable bins help simplify supply retrieval and support more efficient workflows.

01 ANGLED FLOW SHELVING
Gravity-fed angled flow shelving helps keep supplies visible and accessible, even at the back of the cabinet.

02 WALL-TO-WALL ACCESS
Wall-to-wall floor access supports cleaning and disinfection to help maintain a safe, aseptic environment.

1, 2 See back page for details and sources

ARTIZAN® EXPRESSIONS CABINETRY

Create a streamlined operatory with wall-hung storage designed to complement your space and workflow. Artizan Expressions wall-hung cabinets help keep supplies close while supporting a clean, modern look and flexible design.

01 ACCESSIBLE STORAGE
Wall-mounted side cabinets provide accessible storage and a secondary work surface for added efficiency at the point of care.

01 WALL-TO-WALL ACCESS
A wall-hung design leaves the floor clear for wall-to-wall cleaning and better asepsis.

Specialty Cabinets

SYNTHESIS® CABINETRY

01 MOBILE PROCEDURE CART
A no-tip base design enables sturdy room-to-room maneuverability, and flexible options allow you to create the cart you need.

- A Transit Handle
- B Disinfectant Wipe Bracket
- C Single Glove Holder
- D 6 x 6 Storage Bins
- E Soft Edge Contour Top with Raised Corners
- F Sharps Bracket
- G Waste Basket Bracket

02 MOBILE TREATMENT CABINET
Make the most of the space you have. Bring the supplies you need to the point of care with mobile cabinets that optimize space.

03 WASTE CART
Available in 31 in and 33 in heights, waste carts have a no-touch front design with front lock for easy waste removal.

04 LINEN CART
Available in 31 in and 33 in heights, linen carts can assist with the removal of dirty linens, especially from your oral surgery rooms.

ARTIZAN® EXPRESSIONS CABINETRY

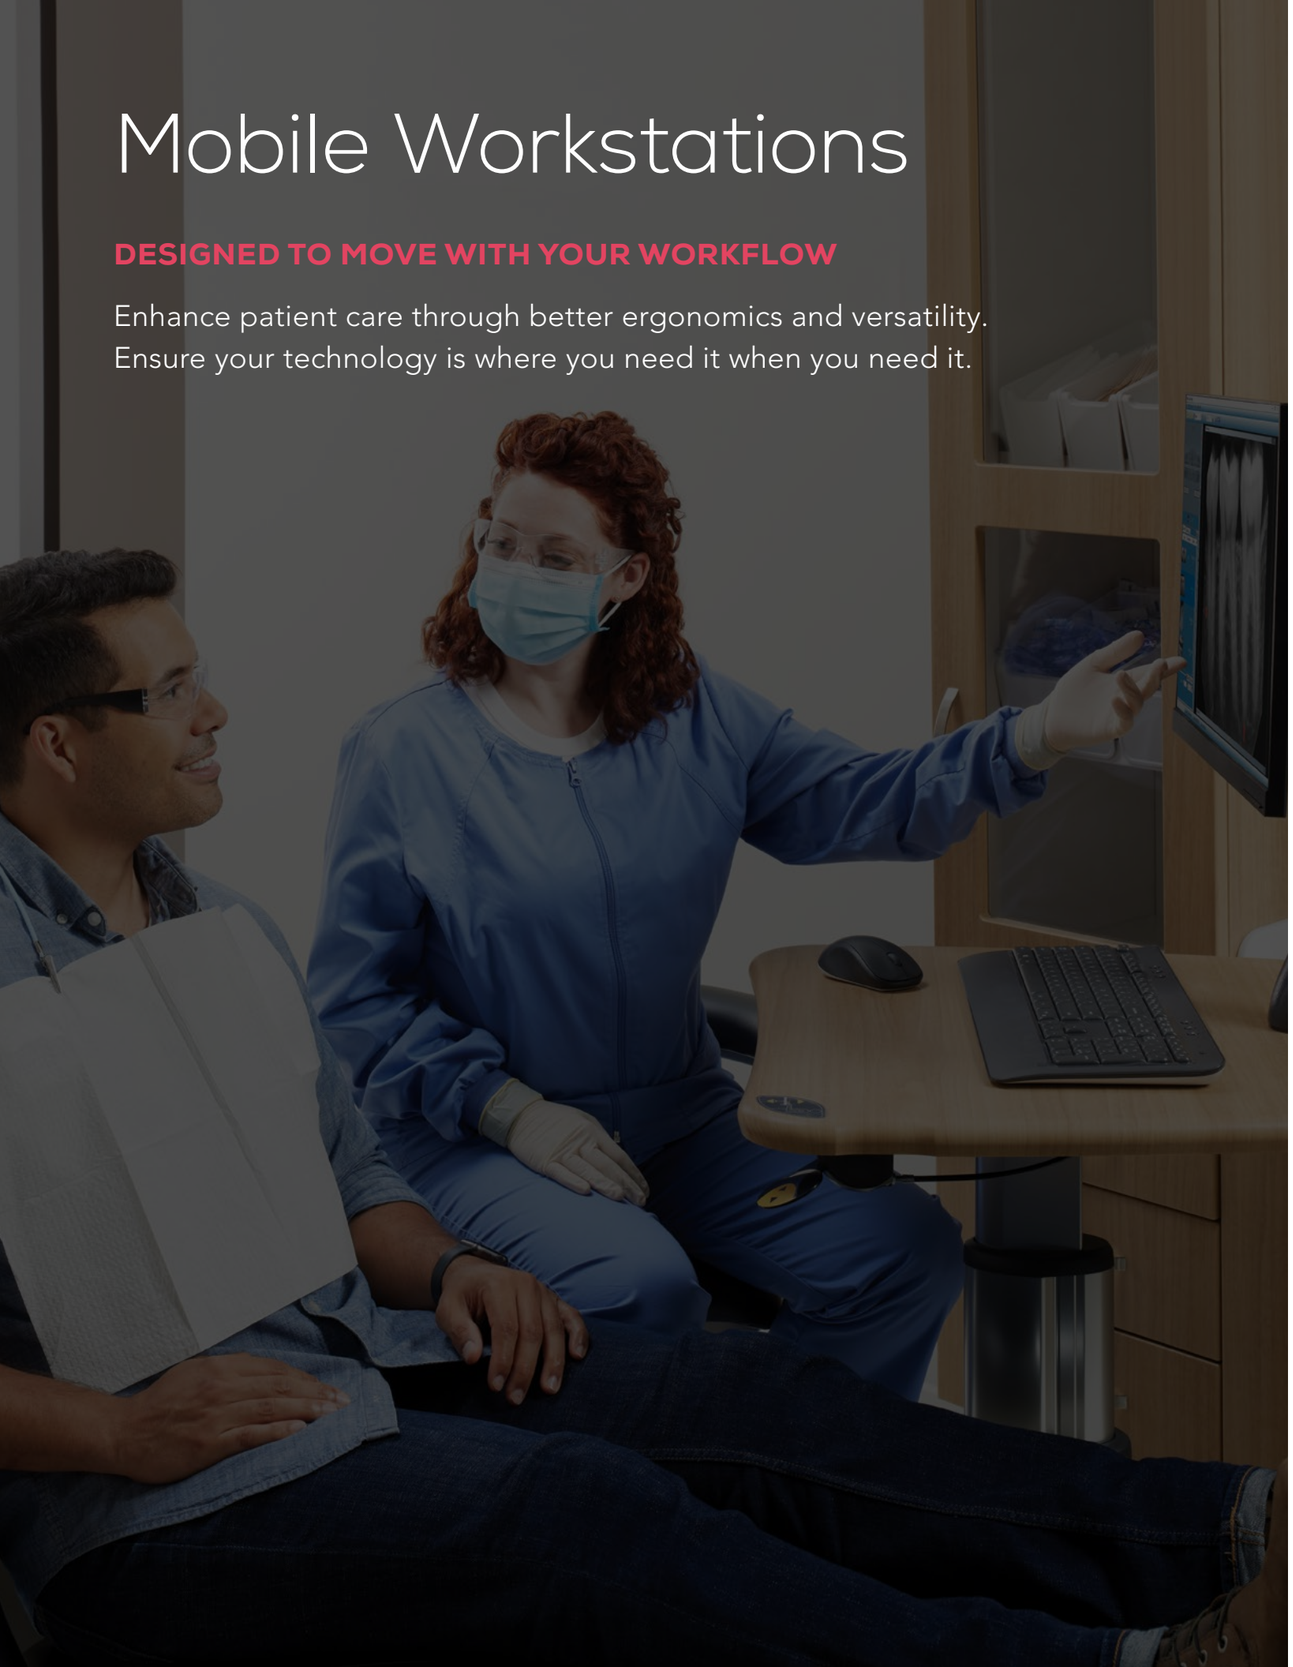
01 MOBILE TREATMENT CABINET
Bring worksurfaces and supplies within ergonomic reach for teammates of all sizes.

02 ORTHO DELIVERY CABINET
Select a cabinet designed for the unique storage and workflow requirements of your orthodontic practice.

Mobile Workstations

DESIGNED TO MOVE WITH YOUR WORKFLOW

Enhance patient care through better ergonomics and versatility.
Ensure your technology is where you need it when you need it.



01

01 6282 WALL MOUNTED WORKSTATION
This wall-mounted workstation is designed with independent height adjustment for standard PC based technology components.

02 6215 COMPACT WORKSTATION
This workstation is ideal for smaller work areas and for wireless users who carry their laptop and supplies room to room, yet need a work area in the operatory space.

03 6212 FLAT PANEL PC
This flat panel PC workstation brings technology to the point of care with a convenient mount for a flat panel monitor.

See What Our Customers Are Saying

"It has almost been ten years since we had our cabinets from Midmark installed, and they still look and perform just as well as when they were first installed! We loved being able to go to the Midmark showroom and see all of their products in work settings. It clearly demonstrated to us our options and allowed us to see and choose exactly which products would best suit our needs. We wouldn't go anywhere else."

Dr. Mark Armstrong
Armstrong Dentistry, Troy, OH

"I really like how modern the Artizan Expressions look can be. It allows a lot of versatility to customize a space to your own style."

Dr. Jenna Triggiani
Two Rivers Family Dentistry, Lisbon, ME
