

# SMART VIEW™

## Better Insight for Better Care

Know how your equipment is performing so you can focus on the people who matter most.

Midmark Smart View is a cloud-based service\* designed to maximize the value of Midmark products by providing real-time performance insights, proactive maintenance tracking, compliance tracking and reporting and software updates through the myMidmark portal.

With continuous enhancements and feature upgrades, Smart View can help eliminate the risks of outdated technology, while enhancing performance to support long-term efficiency and compliance.

Know what's connected and online with real-time performance insights.

Get equipment maintenance alerts before small issues lead to downtime.

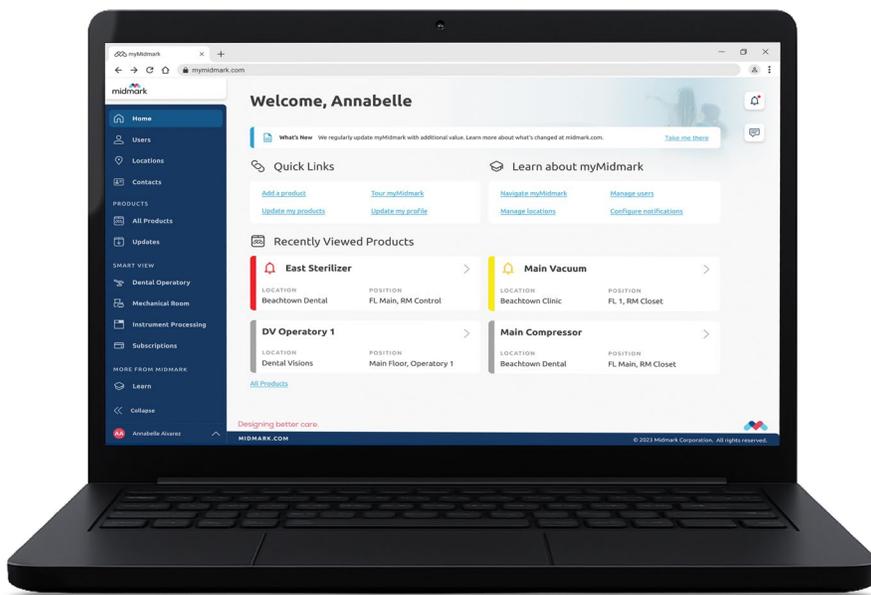

Simplify multi-location equipment monitoring and maintenance tracking with one secure, cloud-based service.

Get notified when software updates are available, and schedule when it works for your team.

Stay focused on care—not equipment monitoring.
