Regional Dental Anesthetic Blocks

Extend your training! This is an exclusive add-on to your Midmark half-day, in-clinic dentistry training on radiographic positioning or dental cleaning, probing and charting.

Nerve blocks are a key ingredient to keeping your patients comfortable both during and after their dental procedure, and this training will make sure you and your team are up to speed on best practices and proven techniques.

Your Midmark training specialist will:
• Introduce pain management concepts for dentistry
• Discuss drugs of choice and protocols
• Review equipment, supplies and technique for delivering nerve blocks
• Demonstrate and help you practice delivering regional nerve blocks for dentistry

Veterinarians and credentialed technicians who complete this session will earn 2 hours of CE credits.*

Also included:
• Special considerations for brachycephalic patients
• Common reactions under general anesthesia
• Tips, tricks and common errors
• What to expect during recovery

Price: $500
