Periodically inspect the following:

- Power cord must be free of visible damage.
- All fasteners must be present and secure.
- All mechanical functions should operate properly.

Cleaning

Upholstery
Wash your upholstery weekly with a mild liquid soap and water mixture, rinse with clear water and dry completely to remove disinfection cleaner build-up. Disinfect your upholstery with a solution of standard bleach and water mixed 1 in 10 (10%) or chlorine based cleaners (see current CDC Guideline for Disinfection & Sterilization in Healthcare Facilities). Follow this with a clear water rinse and thorough drying of material.

To minimize damage caused by disinfectant cleaner residue build-up, do not allow disinfectants to pool on the upholstery surface. Once the approved contact time has been obtained, remove and dry excess liquid remaining on the surface.

Detailed care and maintenance instructions are included with your product. This information is also available on www.midmark.com in the Technical library under the User Information tab for your product.

Painted Metal / Plastic Surfaces
Clean the painted metal and plastic surfaces weekly using a clean soft cloth, and mild cleaner. Periodic applications of common furniture wax will ease cleaning, and maintain the finished luster of the surfaces. Use of chlorine based disinfectant can cause damage to the hand control.

Optional Features:
The table may be equipped with a drawer heater and / or upholstery heater

Optional Features
To turn heater(s) ON / OFF...
Press the desired heater switch. (Switch will illuminate when heater is ON)

Note: The upholstery heater will...
• reach operating temp. in 15 - 20 minutes.
• automatically shut off after 8 hours.

Equipment Alert
The maximum weight the shelf will support is 10 lbs (4.5 kg).

Exam Assistant® Drawer System
To use the drawer front as a shelf...
Pull drawer front down to release magnetic latch.

If drawer front folds past horizontal...
Pull drawer front upward until it snaps back into the horizontal position.
