Matrx™ Central Scavenger
Waste Anesthetic Gas Disposal System Installation

Applies to Models:
40162800

WARNING
Equipment is not suitable for use in the presence of a flammable anesthetic mixture. Make certain that the installation does not interfere with wiring, gas or water pipes inside the walls when mounting the scavenger unit. A qualified contractor may be required to perform these procedures.

Equipment Alert
Trunk line inlet holes are shown with plastic caps. There are two more on back and one on bottom. All unused trunk line inlet holes must be capped. Vacuum Inlet Assembly with Safety Valve must be installed facing downward.

10593000 Rev. FA2 (1/10/19)
Important Information

Intended Use
Operation of all Midmark Waste Anesthetic Gas Disposal equipment is restricted to use in veterinary procedures.

Disposal of Equipment
At the end of product life, the unit(s), accessories, and other consumable goods may become contaminated from normal use. Consult local codes and ordinances for proper disposal of equipment, and other consumable goods.

Transportation / Storage Conditions
Ambient Temperature Range: 32°F to 104°F (0°C to 40°C)
Relative Humidity: 10% to 90% (non condensing)
Atmospheric Pressure: 500hPa to 1060hPa (0.49atm to 1.05atm)

Symbols
These symbols may appear on your equipment and/or in the manuals.

- Proper Shipping Orientation
- Maximum stacking height (Do not stack)
- Fragile
- Keep Dry
- Consult User Guide
- Do Not Tumble
- Handle With Care

Safety Symbols

WARNING
Indicates a potentially hazardous situation which could result in serious injury if not avoided.

Caution
Indicates a potentially hazardous situation which may result in minor or moderate injury if not avoided. It may also be used to alert against unsafe practices.

Equipment Alert
Indicates a potentially hazardous situation which could result in equipment damage if not avoided.

Note
Amplifies a procedure, practice, or condition.

Installation Kit Components

**Installation Preparation...**
Choose a location to install the Scavenger Unit within 6 feet of a 115 VAC outlet.

Note: Use the Cutout Template provided in the Installation Kit to mark the appropriate cutouts for the required installation configuration (Direct Wall or Ducted Vent) and optional rear Trunk Inlet Line holes.

- Auto-close 19 mm Hose Fitting (4)
- Male Adapter 1-1/2 in. PVC (1)
- Lock Nut Conduit 1-1/2 in. (1)
- O-Ring (1)
- Flanged Lock Nut (2)
- Vacuum Inlet Assembly (1)
- Includes Room Air Safety Valve
- Street Elbow PVC 1-1/2 in. (4)
- Outside Vent with screen (1)
- 40 Ft. of 19mm Magenta Scavenging Hose
- 19mm Adapter (4)
- Manometer with Tubing and 1/4” Adapter (1)
- 19mm Female Fitting x 3/4” NPT (4)
- 6 Foot Electrical Power Cord (1)
- 1-1/2” x 1 1/2” x 3/4” NPT RDC Tee (4)
- 19 mm Adapter x 3/4” NPT (4) for RDC Tees
- 19 mm Female Fitting x 3/4” NPT (4)
Remove Cover...
A) Loosen hex head screws on the side of the enclosure.
B) Pull right side of cover out from the screws via the slotted holes.
C) Pull the loose side of the cover free of the enclosure by pulling it from under the fixed left panel.
**Vent Installation**

**Direct Wall Vent Installation**

**Mount the scavenger unit to the wall.**

- Scavenger Unit
- Anchors (installer supplied)
- Holes
- Outside Vent
- Wall Stud
- #8 Screws & Washers (installer supplied)

**Mount the vent to an outside wall and weatherproof as necessary.**

- Trim vent duct length to keep vent flush with outside wall.

**Ducted Vent Installation**

**Use 3-1/4 x 10 in. rectangular duct installed thru an interior wall to vent scavenger unit to the roof or an outside wall.**

- A) Secure scavenger unit to wall anchors.
- B) Press scavenger unit thru wall and into duct.
- C) Use four #8 screws and flat washers to draw together.

**Note:** Round, 5 in. diameter ducting could also be used to vent the scavenging unit thru the wall.

**WARNING**

Do not attach to HVAC ducting.

- Holes Thru Wall and Ducting for Anchors
- Wall Stud
- Wall
- Vent aligns with hole in center of Duct, centered between studs
- Round Gasket
- Cap unused end of Duct
- #8 Screws & Washers (installer supplied)
Install trunk line in ceiling or wall (wall shown on next page).

**Trunk Line In Room (Ceiling Drop Shown)**

- Clamp (installer supplied)
- Ceiling Plate (installer supplied)
- Trunk Line 1-1/2 in. PVC Pipe
- 19mm Scavenging Hose
- Auto Close Fitting
- 19mm Adapter
- Trunk Line Inlet Holes
- O-Ring
- Lock Nut

**Note**
Example shows equipment room and one operatory set-up. Scavenger is shipped with components for four scavenging hose connections.
Trunk Line In Walls (Wall Port Shown)

- Clamp (installer supplied)
- Wall Plate (installer supplied)
- Trunk Line (installer supplied)
- Install Vacuum Inlet Assembly with Room Air Safety Valve Facing Down
- Use 1-1/2 in. Street Elbow connection to Trunk Line
- Trunk Line Inlet hole
- Lock Nut
- O-Ring
- 3/4" PVC Drop (installer supplied)
- 1 1/2" PVC Pipe
- 19mm Female Fitting x 3/4" NPT
- Auto Close Fitting
- 19mm Adapter
- Elbow 3/4" PVC x 3/4" NPT
- 19mm Scavenging Hose

Note
Example shows equipment room and one operatory set-up. Scavenger is shipped with components for four scavenging hose connections.
**Testing the Vacuum Level**

The maximum allowable negative pressure in the central scavenger system, immediately downstream of the gas collecting assembly during normal administration of anesthesia, shall be tested at an excess gas flow rate of zero and shall be 50 Pa (0.5 cm-H₂O) or less.

Follow the instructions printed on the front of the manometer to test the vacuum level at every scavenging hose throughout the entire central scavenger system. Repeat test with all scavenging hose connections open.

---

**Pass = Between Lines = Proper Vacuum**

(1 Atm To -0.5 cm HO)

Directions for use:
1. Mix 1 drop of liquid dish soap with one cup of water.
2. Pour mixture to Fill Line in manometer.
3. Attach scavenger to scavenger hose.
4. Activate scavenger unit. Water level should remain in the PASS zone between the lines during the test.

---

**Use 1/4 in. Tubing with Adapter to Connect Manometer to 19mm Scavenger Hose**

**19mm Scavenging Hose**

**Auto Close Fitting**

**19 mm Adapter**

**VA1300**
